I agree with Hell Guardian, at least put a list of the sources that are in there. Cause for example It would suck if half the sources that are in there I already have. So that would be pretty helpful and I'm sure many people agree.

hav0c1995 - July 2, 2011, 7:13 am

It's 200 mb man. I will download it later on. Can you give the list of the source codes in this RAR Archive? It would be greatly appreciated and put some password on it.

Pitifoul - July 2, 2011, 8:05 am

Thanks man! Works well for me, and don't let the haters tell you otherwise, I waited less than a second for the download to begin, and once it began, only took like 5 minutes to download, which wasn't bad at all for what it contained.
