Thread: [iPad 2 can now FINALLY be jailbroken!](#)

D3xus - July 2, 2011, 4:26 am

The infamous jailbreak developer Comex has released a beta version of Jailbreakme 3.0, known to jailbreak any iPad 2 running iOS 4.3 and above. Currently, all you will need to do is go to this URL: <http://jailbreakme.com>

And hit free and install.

It looks like @comex has released a early beta version to few selected beta testers. And, one of the beta tester has uploaded a video showing how to jailbreak iPad 2 running iOS 4.3.0 using @comex's upcoming jailbreak JailbreakMe 3.0 (PDF exploit). The process seems to be pretty simple - Simply go to jailbreakme.com hit the Free than Install button, and let Cydia install itself! that's it!

Now that the full version was released by comex, over 700,000 devices have been jailbroken with it! Quote:Finally.

JailbreakMe is the easiest way to free your device. Experience iOS as it could be, fully customizable, themeable, and with every tweak you could possibly imagine

Safe and completely reversible (just restore in iTunes), jailbreaking gives you control of your own device. It only takes a minute or two, and as always, it's completely free.

Lol i posted this earlier. xD..

D3xus - July 2, 2011, 4:29 am

I know but this is more of a news release rather than a how to.

Antec - July 2, 2011, 4:34 am

My thread refers to the same thing.

Well i installed backgrounder. And it installed the activator just fine. Then i installed sbsettings with no problems.

D3xus - July 2, 2011, 4:35 am

i know everyone wants SBSettings... and Installous.

ven0m - July 9, 2011, 2:42 am

looks nice.

thanks for the share dude.

D3xus - July 9, 2011, 5:30 am

edited OP with more info
