Thread: [HF's Best Bot | Aryan IRC Bot | 3vBot IRC Bot](#)

Active - July 2, 2011, 11:10 am

Well , due to all the fighting I have decided to have a poll do see who's the more Favorited bot .

AryaN IRC Bot

Link : <https://hackforums.net/showthread.php?tid=1428193>

3vBot IRC Bot

Link : <https://hackforums.net/showthread.php?tid=1322862>

You can vote which one is your favorite based on , price , stability , or you just like the coder .
Please no fake votes .

Requested Information

3vbot soo easy a caveman can remove it .

Both of yours suck.

No but serious Id have to say aryaN because it has ryan in it.

NoThx - July 2, 2011, 11:13 am

Well Aryan does have a "pro botkiller"

Look.

[Video: http://www.youtube.com/watch?v=NJr_VSEGpmg]

But i have to say 3v :)

witchitized - July 2, 2011, 11:15 am

Neither of these are the best, so this thread is already bound to fail.

Tbh i don't have a problem with AryaN, What i have a problem with is him trying to scam his customers selling it by saying it kills the latest 3vBot which we have proven several times it doesn't.

Well that and the fact a shit ton of bots ping out when u run a command.

Your just another 1 of attackers driders. I never took it to far. I defended our product from the false claims attackers was making at the time in order to scam his customers.

Whether it can now kill 3vBot since the update is a different matter but the fact remains it could not kill it in the first place when he was saying it could in order to gain sales.

I'm not supporting either side. I'm just stating the fact that both sides are being immature and should just move on.

Both products do their job, some features work better than others but that is just life. Both need to get over themselves a little

And you've made your point, so there is no sense in continuing. Your actions could act as a catalyst to you actually losing customers because they want their salesperson/coder to be professional and mature.

And you've made your point, so there is no sense in continuing. Your actions could act as a catalyst to you actually losing customers because they want their salesperson/coder to be professional and mature.

Neither of you are doing that at the moment.

Danf showed this on teamviewer with 500 bots and all of 3v's came back when he botkilled with AryaN. Also we waited a while and watched which would hold more bots and 3v had about 150 more like 30 minutes latter when I got off.

Also 3v is a stable irc bot that will be around and improved for a long time to come, AryaN bot will die in short order when NZT comes out and atthackers starts selling that. Although I think it would be better off if someone else sold it or sevium himself did because atthackers reputation is pretty much ruined now.

Try going on Teamviewer with him.

He has a working botkiller with a 3vBot bin. Everyone is saying that the video had no proof that it was a true bin, but everyone is refusing to go on Teamviewer and send a legitimate bin because they know that they are going to be wrong.

If you are all so sure, go on Teamviewer with him and send him bin. The fact that you are all refusing to do so proves your guilt. That means that your argument is resting on one conviction, and that conviction is incorrect.

I've already seen enough proof of aryan not killing 3v on dan's teamviewer and via his properly done video. I cannot teamview at the moment because I am on my droid and have been for the last couple of days as I've been on vacation. However, I think

atthackers would be better suited on Dan's teamviewer because he has a better testing environment than me.

Or if you still want to go the video route, I'm open to watching a video if you have that (if it's in the format that I requested for proof) because neither you nor atthackers has even been able to provide that.

I'm also disappointed that Atthackers won't respond to my posts directly, he either addresses one statement in my post to try to make it look like he's responding or he doesn't respond at all and does it through someone else.

Either way the Aryan killer search's %appdata% and clears out bots in there 3vbot puts it self in many places mostly in registry and other windows places it sets itself as a critical process that may not be hidden or shown in msconfig

Doesn't matter where it puts itself. And you can't put the bot in registry smart one, all it does in registry is put startup but after the bin is deleted can't really do anything. And yes it is shown in msconfig and msconfig just shows startup.

Lol aryaN sucks, atthackers is just going to abandon it and 3vBot is obviously more stable.

BlackHops - July 5, 2011, 10:37 am

AryaN IRC Bot - 26.32% 25 26.32%
3vBot 73.68% 70 73.68%

Looks like everyone knows who the winner is here :)

_char - July 5, 2011, 10:52 am

Doesn't matter its a vote :P more people know of 3vbot than aryan. And @supercoco i will always support AryaN i will just stop selling it. I will still build bins + release updates etc.
