Thread: [Mess Up Someone's Facebook...](#)

Darkk927 - April 15, 2008, 2:36 pm

hey, is there any way to completely screw up someones facebook account beyond repair, or to completely delete it?

i tried deleting the account, but all you can do is "deactivate" the account, but you can easily reactivate it via email password...

icebubba2005 - April 15, 2008, 2:37 pm

Umm if you can get into it change the e-mail address and then deactivate it. If your not in yet then use a keylogger or phish. Rep me if I helped.

Darkk927 - April 15, 2008, 2:49 pm

its a cox email. i tried phishing but its like impossible to do so

i have his fb password, but theres no point in deleting the acct, as he can just as easily bring it back.

i barely know him, so i dont think ill be able to get a keylogger into his computer.

oreo - April 15, 2008, 2:51 pm

Give me his login info, and I bet I destroy it beyond repair ?

icebubba2005 - April 15, 2008, 2:52 pm

Put like a bunch of gay, pornographic images on his acc then report him so he will get banned :) Oh and post a whole bunch of comments on all his friends acc asking them to have man sex with him. That will get his acc deleted :) Rep me if I helpd!

thats actually a good idea. but what if he is somehow able to convince facebook that he got his account hacked, or if he is given one more "chance"?

icebubba2005 - April 15, 2008, 3:54 pm

Chances are it wont happen.

Can someone destroy this fb account?: dodo_isma@hotmail.com..tnx

brdunman - February 19, 2011, 7:04 am

I need some similar assistance. This is of a personal nature, someone who is trying to court my WIFE. Not just a matter of I don't like this person, more of a fact that I need to corrupt this profile to interrupt communication while I can otherwise damage this attempt in other ways as well. I have several emails, and other information for the target, but zero passwords. Assistance required, message me, and I'll be happy to provide all information for as much damage as possible.

ado11 - February 19, 2011, 8:03 am

1. Please dont ask questions like "Can you destroy ..."

2. First you must pay to someone who wants and have time to do that

3. And you should read some things like [rules](#) (dont ask for rep) and RAT,Tutorial or Keylogger section

Thanks ?

Did you already try to hack the account?

lo0kanazn - February 19, 2011, 2:17 pm

lol dont do it man 25charr

ecerena - April 2, 2011, 10:41 am

i do really wonder. is there a way to make someones account closed or deactivated without cracking the login information. What happens if i keep trying to login with wrong password? or how about reporting for abuse from that person from multiple accounts?

Nah, in all seriousness I agree with Squire.

To finally put an end to this thread here is how you permanently delete a facebook account:

http://www.facebook.com/help/contact.php?show_form=delete_account

Fill that in, then change the password. Once the account has not been logged into for 14 days EVERYTHING is deleted from facebook's database and the account is not reactivatable.

Hey. I'm trying to mess up someone's msn. I have their secret question, account information and such. I was wondering how you could do that? Also, I do have their FB information too.

Ty1er Durden - April 6, 2011, 3:32 pm

Yes. Change their password then change it again. Try to sign in using the old password you recently changed and it will give you the option to lock the account and trust me they cant get it back for love nor money.

joncenaxxx - April 6, 2011, 3:35 pm

i wish i could understand how to do this, i am so noob...

Peace Love Ganja - April 6, 2011, 4:02 pm

everyone in here has 1 post and is all asking the same question... wtf...

tehkevmaster - April 6, 2011, 5:20 pm

invite him over FB give him a excuse n link him too a site that logs his IP once youve done that use his IP to acess his location which then wont need a security question then you inside. hope dis helps
