Thread: [Hey I need a simple Keyloggger](#)

nate1579 - July 6, 2011, 2:03 am

I am looking for a simple keylogger for my kids one of them have been getting on a site that charges my phone bill.

I need to find out who they all have several accounts with no passwords but i have a camera pointed at the computer so I know when there on there problem is I don't know what time it happens so I need something that don't pop up in the right hand corner just runs hidden.

I tried setting up some of the stuff on here I am not getting emails or anything so please any advice?

Thanks in advance

I believe there are some out there on the internet SPECIAL for parents who wants to see what their kids are doing....

Idk the exact name, but you need to find it in google!

I have a child friendly internet browser of mine that prevent your kids from accessing any site you don't approve of. I've full legal rights to sell, message me if you'd like to buy. I'll sell you it for around \$10, message me if you'd like a full list of it's features and/or to ask questions.

just use griever logger v4, its pretty simple and good, but you might need to get it crypted if your kids have a decent antivirus.

Can't you just check their history....Whoever has the site in their history is obviously the person who did it..
