Thread: [How to set up a Proxy + Get proxy lists!](#)

Xaros - July 6, 2011, 8:28 am

Hello everyone, today I'm going to show you the program Proxifier. This program is easy to use, even for beginners! Alright, let's get started, shall we?

Requirements:

Proxifier available for download [here](#).

Q & A:

What is a proxy? : A proxy is like a middle man. It exchanges packets between Host One, and Host Two. Therefore, Host One's IP is masked from Host Two seeing it.

How easy is this tutorial to follow? : This tutorial is fairly easy to follow, a beginner with common sense should have no problem following along.

What will I learn from this tutorial? :
How to set up Proxifier

How to obtain a proxy list

How to use that proxy list

Part One: Getting the proxies!

Now, to get our proxy's IP and Port, we must head over to [this](#) website.

Now, pick one of them. and head on to the second section to learn how to use it!

Part Two: Using your proxy!

First open Proxifier

Hit continue evaluation

Now, near the top left of the program, you should see a hammer in front of what looks like an application window. Click on it.

Now, hit 'Add' and enter the information for the Proxy that you gained from Part One: Getting the proxies!

Now, hit Okay, and make sure the box beside the Proxy you just added is checked.

Let's see if it worked! Head over to [here](#).

If it loads, you have a working proxy! You should also notice that your IP has changed. This is because you are now using the proxy server as a middleman for all of your packet transfer.

I hope this thread has helped you guys learn:

A. How to set-up a proxy.

B. a little bit about how a proxy works.

PAKbugs™ - July 7, 2011, 5:15 am

Nice tut...will come in handy :D

Bookmarked!!!

VeLo - July 9, 2011, 10:51 pm

Saving this for later. Thanks a ton.

Xaros - July 10, 2011, 4:49 am

Haha, yeah. No problem man.

][h3_l3rown_Kil) - July 21, 2011, 10:03 pm

How do you check for the fastest proxy with this?

BreastMilk - July 21, 2011, 10:18 pm

thanks for the tut, i have bookmarked it for further use!

Got Bamf - July 21, 2011, 10:51 pm

I prefer foxy proxy but nice tutorial dude keep it up. :D

triggerman - August 15, 2011, 10:03 pm

great tut man, really helped me get started.

many thanks.

Niemand - August 27, 2011, 1:27 pm

Awesome post! Bookmarked this for later.

berzerk - September 17, 2011, 12:17 am

Thanks for the tut, good for newbies like me.

Zeilox - September 17, 2011, 3:55 am

Nice read, was easy to follow and very usefull, thanks :)

lady84 - September 17, 2011, 5:55 am

Great point!Put everyone in there place

snikkel - September 17, 2011, 7:21 am

heads up mate, it might be something i can't change but it makes my internet pretty slow when i use it:P

romeo00 - September 25, 2011, 5:39 pm

nice tutorial and you earned money when clicked their right.

Jinu - October 5, 2011, 12:56 pm

Not understand the part one 2.

Please tell clearly how can we pick one of them?

ExpensiveTrend - October 22, 2011, 2:22 pm

Thanks man, worked perfecty. but i was wondering if i should use more than 1

battlebudy - October 30, 2011, 8:53 am

thanks for the information im gunna try this

james93 - November 22, 2011, 1:20 pm

Lock by lock and one after the other is the key to good hacker. You can not open the door number 9 before the number 8 unlocked.

hackeye - December 1, 2011, 7:06 am

nice way to hide your identity, but windows 7 has got proxy, DNS, VPN support.

Firefox has got proxy support, or download Foxy-Proxy.

<http://proxify.com/> <http://newipxnow.com>

so why use this one?

ret0102 - December 1, 2011, 12:36 pm

Is it safe to use this method before sending someone a Denial of Service attack>? forgive me for such stupid questions, but I was told it wasn't the smartest thing to do, but this being easy as it is I would like to do it this way.

Hyperkinetic - December 6, 2011, 2:16 pm

Thanks for the tut! Made setup a breeze

hcgl - December 6, 2011, 2:30 pm

Thanks for the tut!! I made it in an evening :)
