Thread: [Task Manager Logs & Save the file .txt \[Source\]](#)

iBoNeT - July 6, 2011, 10:57 pm

I coded a program for the event log of the task manager, it is up to you. :)

Picture's : Spoiler ([Click to View](#))

Download : <http://localhostr.com/file/t7BBVqx/Task%20Manager%20Logs.rar>

H4CK-MY-G4ME - July 6, 2011, 11:11 pm

OMG that's the easiest program to such a program!

Eclipse - July 7, 2011, 1:18 am

I might use this sometime. Thanks for this (:

The Unknown - July 14, 2011, 5:06 am

I forgot the codes and I searched and found this thread and it helped, thanks OP...

KingCobraXD - July 14, 2011, 5:29 am

That's not really logging Task Manager. All ur doing is getting the processes and their info (Deceiving thread title)....-.-"

ListView1.Items(i).SubItems.add(System.Environment.UserName) replace that with :
ListView1.Items(i).SubItems.Add(poc(i).id) ' Put whatever you want. ;)
