I've found a big addon for phpbb3 forums, and it's sqli-vuln!

google dork:

inurl:mypage.php?id=1

Much sites are using this addon (over 1000 forums)

Here are some big forums with the addon:

Quote: <http://www.gig-board.de/mypage.php?id=3> (2500 users)

<http://maxedgaming.com/forum/mypage.php?id=5> (1000 members)

<http://poke-friends.net/forum/mypage.php?id=19> (1000 members)

<http://www.tierpla.net/mypage.php?id=3> (700 users)

<http://www.spieleresidenz.de/board/mypage.php?id=1> (600 users)

<http://www.casualadultgamers.com/mypage.php?id=58> (600 users)

There are so much other mypage.php vuln (big) sites ;D

enjoy

Nice find, but even if you find admin on it it's hard to crack those hashes :]

So good luck with that.
