

Forum: [Hack Forums](#)

Thread: [Graphics Requests](#)

sir aaron - July 9, 2011, 10:10 am

Okay, I know there is a section for graphics request but I didn't really understand the format to request a graphic.

I am really new to the whole hacking society and I was sent here by a friend of mine.

I am looking for a signature that says HackersPlus (one word), has a black background, contains the color green (neon green if possible), and I would like to be surprised with whatever you would like to add to the signature.

Also if you would be willing to put By: (your account name) in the bottom right corner of the signature so all hackforums.net users would know who the creator is.

Thank you and private message me if your willing to do this for me.

There's a sticky in the requests section for help on this.

Thank you, appreciate the help and the common sense to not point out the obvious.
