Thread: [Bitcoin GPU Miner](#)

JuryBen - July 10, 2011, 8:47 am

Hey guys I was ask to code a GPU miner and basically I ripped some code and bam, silent GPU bitcoin miner done within an hour. Are people interested in purchasing it? So far I've only tested it with OpenCL and ATI card.

At least he's truthful, just because majority of people don't admit it doesn't make them any better.

emjay - July 10, 2011, 9:49 am

I ain't even gonna lie, next time I have paypal money, hell yes.

Chanabra - July 10, 2011, 9:56 am

Looks interesting giving this a try

It's actually perfectly fine, people build off of other people's work all the time. It's only a problem when they claim it's their own.
