Thread: [\[HOTWITHPICS\] How To Hack Your Schools VNC System So You Can Control Their Computers.](#)

OzTech - August 18, 2011, 12:45 am

FIRST TUTORIAL (Be Nice and Tell me what i can improve on. Don't tell me its my english, i know .)

[\[IMG\]http://img718.imageshack.us/img718/9190/howtogain.jpg\[/IMG\]](#)

The Error Should look like this :

[\[IMG\]http://img651.imageshack.us/img651/6778/img20110801143158.jpg\[/IMG\]](#)

[\[IMG\]http://img840.imageshack.us/img840/6148/howtogain3.jpg\[/IMG\]](#)

Code \HKEY_CURRENT_USER\Software\ORL\WinVNC3>Password
or

\HKEY_USERS\DEFAULT\Software\ORL\WinVNC3>Password

Code To decode the password you can download the following programs depending on which one you like. (code is on bottom for quick copying)

Cain & Abel (http://www.oxid.it/downloads/ca_setup.exe) (it will be detected by a AV no matter what, unless its a shit AV lol. so dont be saying shit in my thread or GTFO)

Or

VNCon(Portable version:<http://vncon.chronetal.co.uk/downloads/vncon114.zip> .exe
version:<http://vncon.chronetal.co.uk/downloads/vncon114.exe>)

Code To Connect to servers or VNC's Use the VNCviewer in the VNCon Package.

Spoiler 1&2

[\[IMG\]http://img199.imageshack.us/img199/2056/thing1x.jpg\[/IMG\]](#)

[\[IMG\]http://img21.imageshack.us/img21/9960/howtogain4.jpg\[/IMG\]](#)

Spoiler 3

For VNCon

[\[IMG\]http://img51.imageshack.us/img51/2558/34134.png\[/IMG\]](#)

For Cain & Abel

[\[IMG\]http://img716.imageshack.us/img716/6418/ghgdrgrg.png\[/IMG\]](#)

Uploaded with [ImageShack.us](#)

Connecting to a Random VNC server[\[IMG\]http://img7.imageshack.us/img7/435/unled2kn.jpg\[/IMG\]](#)

IM IN!

It would look better if it was written and not screen shots from else where. I just think it would look a little tidier and professional.

I am not trying to be rude if it reads like it..

So you are on two forums with me then ?? lol

OzTech - August 18, 2011, 3:16 am

Lol no offence taken hun ..

Wait if this was a while back lets say 2 weeks I put one up but looked shit and nothing so made anotherone. Hah not sure hun its my first one so im learning

jfishy - August 18, 2011, 4:26 am

Thanks for sending me link! However, the school I go to is technologically advanced and I won't have the risk of getting caught even if I will use a spoofed mac address.

Roowie - August 18, 2011, 4:39 am

Thanks, this is where I was looking for!

Fiddl - August 18, 2011, 4:38 pm

Really awesome tutorial!

Do you know if this works with older Windows too?

Mash22 - August 18, 2011, 5:38 pm

VEry nice tutorial :) Long live Lebanon ;)

shijil619 - August 19, 2011, 5:54 am

You are the Best!! I really needed this. This is very good TUT you have made here. I just love this.

Good Work Bro! :)

OzTech - August 19, 2011, 5:57 am

Thanks Cuz :0 <3

i appreciate it

..thanks gain

aperez43812 - August 20, 2011, 11:38 am

Best I seen, especially with pictures[align]

Great Tutorial!

The Black Hacker - August 22, 2011, 9:07 pm

great work and keep it coming and i will definitley try

Ven0^ - August 23, 2011, 7:18 am

This is a great tutorial, I don't have use for this now though :)

Would rep if I could :\

Stevo - August 23, 2011, 7:56 am

Awesome tutorial, shame I finished school, always wanted to do this while i was sitting there bored at school! Well done.

As mentioned earlier, would present much nicer if it was all writen up and not in screenshots, constructive crit, for ya :)

prowlers34 - August 25, 2011, 2:37 am

This is a very nice and informative tutorial. I'll be testing out some of the methods and see what mischief I can cause. Thanks for the inspiration :)

dismayed - August 25, 2011, 2:45 am

I already knew the LAN cored XP glitch. Thanks for your help, but if your computer reboots (Like some computers do at my school) let it reboot and leave the LAN cored out. Then at the login screen type in your user and password as normal, then the error message will appear. Then put your LAN cored back in. This should not reboot your computer. Tested and found by me :)

OzTech - August 25, 2011, 3:11 am

No this was not found by you. You don't even need to restart and take the cord out. Please if your going to claim shit as your own do it somewhere else and not on my thread. don't take in offense.

dismayed - August 25, 2011, 3:28 am

Well I take no offence but I found it out my self. I didnt read any threads about it either

alertmotive990 - August 25, 2011, 5:02 am

great work and keep it coming and i will definitley try this

mo7sen - August 25, 2011, 1:43 pm

thank for your good work ,that is really nice job :d

toriqq - August 27, 2011, 3:15 am

this a is great work. will try in sch (:

Baziro - August 27, 2011, 4:22 am

lool excellent i will make this of course, thanks dude very interesting

GL1TCH3D - August 27, 2011, 4:52 am

looks okay, but my school uses windows 7, not windows xp

OzTech - August 27, 2011, 5:03 am

R (Aug 27, 2011 04:52 AM)GL1TCH3D Wrote: [\[CITE\]](#) looks okay, but my school uses windows 7, not windows xp

Bro it workd on all windows operating systems

Big Nastyy - August 27, 2011, 5:24 am

Careful people the school admin board is always checking internet secuirty and you will get into serious shit if they feel like dick's about it, He warned you..

OzTech - August 27, 2011, 5:34 am

cuz, what are you talking about? I get u but a little bit only .. If you do any type of hacking u get the shit but .. Obviously if u do it anonymosly then diff story..

Thats what hacking is.

Cletus - August 27, 2011, 6:32 am

Great tutorial, i will definitely have to try this for sure.

OzTech - August 27, 2011, 6:34 am

(Aug 27, 2011 06:32 AM)Medijuana Wrote: [\[CITE\]](#) Great tutorial, i will definitely have to try this for sure.

Thank you sir ;) I appriciate it

Thanks again (Aug 27, 2011 05:24 AM)Big Nastyy Wrote: [\[CITE\]](#) Careful people the school admin board is always checking internet secuirty and you will get into serious shit if they feel like dick's about it, He warned you..

Oh I get you now haha thanks for exposing my topic ;)

Big Nastyy - August 27, 2011, 5:42 pm

Sorry that time i posted that i was really baked, Good tut :)

OzTech - August 27, 2011, 6:29 pm
