Thread: [\[TuT\] How To Spread Your Rat E-Whoring \[Method\]\[Noob Friendly\]](#)

Manning - July 11, 2011, 9:12 am

Hey HF,

This method is 100% and not 100% confused? This method will not get you every victim you talk to, but i can 100% guarantee you will get victims as long as you follow this tutorial.

I've been in the e-whoring business enough to the point where all pedos usually ask for free samples pictures and then they run. Now that I've started ratting I have combined both businesses together. This method is for you to disguise yourself as a e-whore to get slaves. People may already know of this method, but there is many who don't. Some people feel that you must make a torrent, and then get enough seeders to the point where you don't get banned, or have to make youtube video. This method is 100% easier and still effective.

What you need:

A brain

Basic Social Engineering skills

Msn

Few non-nude pics and 1 naked pic (All of the same girl, make sure its here whole body including face)

The internet? (Noob Friendly)

A Rat

Crypted Rat

Step 1:

Setting up the rat:

-Make sure your rat is crypted FUD (optional: also you could bind it with a nude pic).

-Make sure the icon is a folder type icon. Then give it a name including your e-whore's name and "nude". E.x AshleyNudes

Step 2:

E-whoring to success:

-Now that you have your rat set-up its time to get clients. go to a popular site such as chat-avenue.com/teenchat.html

-The teenchat is the best, because of how irresponsible and reckless the kids are, they do anything to see nude photos.

-Make sure your teen chat name is the same as the folder you made

-Once connected use something catchy but smart.

-What you should put is (Asl, Reason why you would be giving away pics, contact Use the colour codes to help you see what I mean)

Spoiler ([Click to View](#)) "19.F.Canada, Im so drunk and h*rny would anyone wanna see some nud* pics", add me ashley12345@hotmail.com

(MAKE SURE YOU HAVE SPACE BETWEEN YOUR EMAIL WHEN ON CHAT SITE OR I WILL GET BLURRED OUT e.x ashley12345@hotmail.com

Step 3:

Social Engineering Kids:

-Ok you now should have about 10-30 contacts adding you on msn depending on how long you spam the site.

-They will begin by starting with "Hi" then "How are you" simply reply girl like with "Hey xx, I'm pretty drunk n horny hbu (How about you)" then they will either say "good can i see pics" or you bring the pics up by saying "Would you like to exchange pics" this is where they say "yes then you begin by sending him 2 real pics! (NOT THE RAT) they will get so into it they will ask for more or possibly nude.

This is where you begin by saying "would you like to see my nude folder" they will reply with a "yes" this is where you SAY! "But if i give you these you promise not to leave, I've had to many boys take my pics and leave" <--- That is the golden ticket to victims, that makes your folder 100x more believable. Now you send them the file he downloads it and you simply reply with "It has about 10 pics, and brb I gotta reset my connection" then once they download it delete them from your contacts.

<http://img808.imageshack.us/img808/1564/imageshack2.png>

in the end you should have manyclients

I don't get why you guys keep trying to get pedos or old guy slaves. Whats the fun in that? Then we'll have a bunch of people here posting "ewww.. I caught a pedo that has CP on his hard drive.. I'm going to blackmail him and burn him at the stake!!!".. or "my slave has been wanking off for hours at animal porn..." Sure, if you are into that... If you guys dont want to see guys wanking off on your slaves, here's an idea... Why not try and e-whore yourself as a HOT guy so that you can get girls on your RATs instead?

Or be yourself and talk to the girls and convince them to open up your RAT. You'd be surprised how horny girls are these days.. they would open pictures of hot guys any day. Eventually if you e-whore long enough, you will start to believe you really are a girl.. or maybe you will lose the self-confidence to go out and talk to a real girl as a guy and not a girl.

Mkay, so you dont make to much sense..

1st. Its teen chat, most of them are gamers, and thats free accounts

2nd. Lesbian chat, is to get girls thought that was obv.

3rd. Why you got flame you mad bro?

Lose your self-confidence to talk to a girl in real life, WTF? anyone who thinks that has self confidence issue already as it is if they think thats gonna happen
