Thread: [\[Tut\] \[\[NEW\]\] \[Rendering with the Pen Tool \[\[NEW\]\] \[Tut\]](#)

-DeLuXe- - July 11, 2011, 4:25 pm

[IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/Introduction.jpg>[/IMG]

This is my first ever tutorial. So i hope you enjoy it. ?

[IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/rendering.jpg>[/IMG]

STEP 1 - Choosing a sotck

First and foremost select a stock that you wish to use.

Today i will be using this one:

[IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/stock.jpg>[/IMG]

Step 2 - Selection

Select the Pen Tool ([IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/pentool.jpg>[/IMG]) from the options. If you can not see this go to: Window > Tools.

Step 3 - Curves and Straight Edges

Usually I zoom in about 800% when I render but for the perpose of showing you, I have zoomed out.

For curves click on a start spot then click and hold in a new spot that you desire. Do not let go of the pointer.

Drag the new selceted point to add a curve. Like this:

[IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/curve.jpg>[/IMG]

After you have finished one curve hold down alt and left click the new point you have made so you can get rid of the handle, after doing this you can continue with the rendering. Repeat if using curves.

Now for the straight edges i do not hold and drag the mouse for this. I just click in the spots around the stock. Like this:

[IMG]<http://i1237.photobucket.com/albums/ff469/twitchez1/straight.jpg>[/IMG]

Step 5 - Moving a point

If you have placed a point in the wrong spot you can move it by holding down ctrl and left click and dragging to the new spot.

Or you can ctrl + z

Step 6 - Completing the Outline

Once you come back around with the Pen Tool Click on the starting point and it will compleate the line.

Step 7 - Completing the Render

after going around the whole stock and have finished the Pen Tooling all you do is right click > make selction. A window will pop up, just press ok then you will see marching ants around the stock. Press delete to get rid of the background leaving you with your render.

[IMG]http://i1237.photobucket.com/albums/ff469/twitchez1/outcome.jpg[/IMG]
[IMG]http://i1237.photobucket.com/albums/ff469/twitchez1/finalrender-1.jpg[/IMG]

I hope you enjoyed this tutorial by me. Hope it helps some of you. Thanks
Please leave comments and feedback below.

Blazon - July 11, 2011, 5:54 pm

Very nice tutorial. I use this method when I have to render.

Ui Hirasawa - July 11, 2011, 6:21 pm

I've known this for a long time, but thanks for the tutorial ?.

-DeLuXe- - July 11, 2011, 7:18 pm

(Jul 11, 2011 06:21 PM)?ScripT Wrote: [\[CITE\]](#) I've known this for a long time, but thanks for the tutorial ?.

Yea same here but i wanted to show this to people who didn't really know this yet. But it is a good way to render :)

Ryzo - July 11, 2011, 8:14 pm

Nice tutorial, Anyway you could tell me how to make your avatar?

crackerjacks - July 11, 2011, 8:22 pm

thanks for share broo... nice tut... i will try it

VictorMLP - July 12, 2011, 5:44 am

thx for the nice tut, just learned some more about pen tool.

Mr Kewl - July 12, 2011, 8:04 am

Nice Tutorials,
Will be helpful. ?

-DeLuXe- - July 12, 2011, 9:08 am

Glad you guys enjoyed it :)

Hope to hear from other people too :D

OreosS - July 12, 2011, 7:32 pm

Very Very nice tutorial.

It helped me out so much i was using the lasso tool when i tried rendering.
This makes it like 1000% easier.

Vouch for this member and I hope some other people find this useful as i did.

-DeLuXe- - July 12, 2011, 9:05 pm

Thanks for the vouch ?
Please post more comments ?

OreosS - July 13, 2011, 9:33 am

Question:

When i right click and go to Make Selection and then press OK it goes around the render and not the background. How would i invert it so it goes around the background and not the render?

-DeLuXe- - July 13, 2011, 11:05 am

(Jul 13, 2011 09:33 AM)OreosS Wrote: [\[CITE\]](#) Question:

Oh Uhm i have had this before and i am pretty sure you press Shift+Ctrl+i
it will inverse it and go to your background.

Makaveli The Don - July 13, 2011, 3:31 pm

hmm Glad someone is making a great tutorial. This will come in handy some time! Thanks.

RvsK - July 13, 2011, 6:46 pm

Nice outcome!

But could you include what to do if there is hair/fur in the picture?

-DeLuXe- - July 13, 2011, 7:08 pm

(Jul 13, 2011 06:46 PM)Black Cat Wrote: [\[CITE\]](#) Nice outcome!

Yes, that is a great idea man. I will get right on that!

Thanks for the idea.

Keep the comments coming please!

b0lt - July 16, 2011, 8:19 am

Good job for your first tut :) I use this method too

blaize9 - July 16, 2011, 6:38 pm

Hmm ive seen this somewhere, but still its a good tut =D

Red Acid - July 17, 2011, 8:39 am

Nice tut bro.

keep it up.

Thanxxx for the share.

-DeLuXe- - July 17, 2011, 10:00 pm

Haha thanks guys :D

Glad you like it. Will be creating more in the future.

Keep Commenting!

if-ea - July 22, 2011, 2:38 pm

thankzz ill try it

<content> .

What did you think of it?

GuJJu - July 23, 2011, 10:52 am

Thanks for the awesome tutorial, will try it.

Hailow - August 12, 2011, 5:37 pm

Delux Is the pen tool alot easier to control rendering then the 3 lasso tools?

-DeLuXe- - August 13, 2011, 9:08 am

(Aug 12, 2011 05:37 PM)Hailow Wrote: [\[CITE\]](#) Delux Is the pen tool alot easier to control rendering then the 3 lasso tools?

It makes it a lot easier for me because if it connects when you don't want it to, you cant undo it and it pisses me off lol. I really think the pen tool is easier yes.

-DeLuXe- - August 15, 2011, 9:29 pm

Anyone got any outcomes? I am curious to see them :)

Hailow - August 16, 2011, 8:54 am

For me the outcome is i have officially quite using lasso tools and adopted the pen tool technique for my rendering D=.

Rumburak - August 16, 2011, 12:52 pm

Very nice tutorial. Very usufel, each day new lesson :)

-DeLuXe- - August 16, 2011, 7:41 pm

Glad you guys like it :) Hope to hear from more people :P

+mK - August 16, 2011, 8:05 pm

You need to go to Layer>Matting>Defringe, to get rid of the LQ border around it.

GrOwlit - August 17, 2011, 5:56 am

Thank you so much for the share with the community!!!

Sidious - August 26, 2011, 3:58 am

Great tutorial. :)

I've been using the background eraser or the quick selection and magic wand tools to get this effect but this is more clean and tidy. Thanks for posting this. :)

Hailow - August 26, 2011, 4:49 pm

Been using this technique awhile now.

It's been much more pleasuring now trying to crop and i owe it all to you.

Thanks a ton!

GFX Panda - August 28, 2011, 3:58 pm

Nice tutorial mate, very detailed and specific. Keep up the good work.

-GFXP.

-DeLuXe- - August 29, 2011, 9:53 am

Thanks for the feedback guys. Appreciate it. Post your outcomes, I want to see them :p And I can tell you what you can do to fix it and spiff it up.

Iron m@n - August 29, 2011, 11:34 am

Good tutorial bro..Keep it up! ?

xsynysterx - September 2, 2011, 10:15 pm

This is awesome thanks for the tut:)

Kevo_ - September 5, 2011, 8:10 pm

What if we get to a part of the image where the background is hard to tell apart from what you want to render? Any way to change the display settings so you can tell it apart easier and then change it back?

Clones - September 16, 2011, 9:36 pm

Very nice sharing mate, thanks for sharing :)

.vB - October 22, 2011, 1:58 pm

Good TuT, what font would this be? It looks pretty cool.

Uzi? - October 22, 2011, 10:35 pm

Very informative tutorial man!

Well done, I love it- thanks.

Fascinate - October 23, 2011, 2:31 am

On step 3 you miss spelled selected. Good tut though.

Drag the new selceted point to add a curve. Like this

General Stalin ? - October 30, 2011, 6:14 pm

There is a easier way rendering an object, shall I tell you how?

USE MAGIC WAND! WTF!

JustinH - October 31, 2011, 1:14 am

Very cool tut bro,

I hope you will make more things like this

-DeLuXe- - November 27, 2011, 4:57 pm

(Oct 30, 2011 06:14 PM)Tupac™ Wrote: [\[CITE\]](#) There is a easier way rendering an object, shall I tell you how?

USE MAGIC WAND! WTF!

The magic want doesn't select multiple colours it is only used for one solid colour in my opinion.

But thanks for trying.

And thank you for everyone for your comments. i appreciate it.

lacedweed - November 28, 2011, 6:24 am

Suprising good tutorial for your 'first tutorial'.

Google.com - December 4, 2011, 6:36 am

Really nice tutorial for your first, loved it, keep it up!

muciex - December 2, 2012, 1:19 pm

Thank's for the tutorial, very detailed :D

hiraeth. - January 22, 2013, 2:38 am

Wow, nice tut. I'm sure it will help many other members!

ridick1 - July 31, 2013, 2:29 am

Thanks, this is helping me out very well :D

rauanqrox - July 31, 2013, 2:39 am

after the selection and before delete , there should be select inverse so as to select the background.

chandra24 - July 31, 2013, 6:23 am

thanks buddy it was nice !!

it will help me much more in editing.

Raddify - September 14, 2013, 7:38 am

Thanks for the tutorial. Helped alot! Now I can use this <3
