Muscle Nerd - July 11, 2011, 7:23 pm

THE FUCKING PASSWORD IS AT THE BOTTOM!

Hey everybody, tricky here again with another share.

Just giving up a collection of premium fonts to everybody, I didn't see any similar ones so I wanted to share!

If you post in here I will send you the password along with everyone else that posts.

I would appreciate it if you sent the people you want to share it with to this thread instead of leaking it out, but you're gonna do as you please.

EDIT: HERE IS THE NEW DOWNLOAD LINK! WORKING! Spoiler ([Click to View](#))
<http://www.multiupload.com/X7ke6xr9b5>

Hack Forum Member: "Hey tricky I just downloaded your ultra cool fonts, how do I install them really fast?"

trickyownz1: "That's easy good fellow! Add the fonts shortcut to your SendTo bar, then highlight the fonts and click SendTo!"

Hack Forum Member: "But tricky I don't know how to do that?!"

This is what it looks like before.

trickyownz1: "That's simple good sir! Windows 7 user? Find your fonts under appearance in your control panel. Then swiftly make a shortcut. Then go to any window browser and type this in "%APPDATA%\Microsoft\Windows\SendTo" without the quotes.

You'll get this page. Spoiler ([Click to View](#))

trickyownz1: "After that, take your shortcut and throw it in there!"

You should now have your shortcut in your SendTo bar.

Hack Forum Member: "Wow tricky you're the greatest!"

BUT WAIT IT GETS BETTER! THE SECRET FONT INSTALLER PEOPLE DON'T WANT YOU TO

KNOW!

Spoiler ([Click to View](#)) Open up your brand newly downloaded fonts, go to the search bar and type in ".otf" with the quotes, highlight all of the fonts, and click SendTo. Watch your new fonts be downloaded seamlessly and in one click. No more hassle!

Now if you really wanted to, I hear there are Font Application installers, but this is a manual way that works really well and self-integrates itself into programs such as Photoshop CS5.

Either way, this took me an hour to upload, 45 minutes to write.

IF YOU DOWNLOAD TAKE 10 SECONDS TO SAY THANK YOU!

I know my way around the computer ;), but the more fonts you hold on your machine the slower things will start, such as word 2011 (not a typo, i use mac..) and photoshop. Even with the fonts being cached, it's still resource intensive to have fonts that you don't need/want. So installing 2300 fonts and only needing or wanting 700-900 of them is a complete waste of system resources. Anyways it was a great pack, just didn't think I'd use them all, so i picked out the ones that caught my eye or i found simple for future program or website designs.

adiiforu - July 17, 2011, 6:56 am

can I have the pass please..
