Thread: [SSL certificate invalid date & SSL 2.0 deprecated protocol vul](#)

krhr_krhr - July 12, 2011, 3:08 am

One or more high-severity type vulnerabilities have been discovered by the scanner. A malicious user can exploit these vulnerabilities and compromise the backend database and/or deface your website.

SSL 2.0 deprecated protocol
SSL certificate invalid date

I found these two vul ...can any have these exploits post it here plz...Or if u know how to hack website using this post it here friends..

n31ght0 - July 12, 2011, 3:15 am

i think that is false positif ?

krhr_krhr - July 12, 2011, 3:17 am

i also thinking like that...But if true how can i use that vul

It makes man in the middle attack possible. But general nothing useful.

krhr_krhr - July 12, 2011, 4:12 am

ohh thanku..verymuch

??¢??? - November 16, 2011, 5:12 am

you need to be in the network and bruteforce the protocol i guess to be able to decrypt the data sent into the network.
