Thread: [\[Release\] t3c4i3's FUD Crypter\(Scantime\) v1.08 \[Updated 28th September\]](#)

H3LL - September 16, 2009, 1:39 am

If you want to buy

Spoiler ([Click to View](#))

I've been asked if i'm selling the private version. First you guys must know, this is a scantime fud crypter. If you are willing to buy this alright.

I'm not sure how the prices for well known crypter goes so here is my deal

1.) 10usd for current private version stubs

2.) 15usd for 1 month updated versions stubs

Description: Added few stubs

Description: Scantime Crypter

Detection Rate: Depends on how you crypt them. Look at option 3 in main menu.

[Download link](#)

would be great if a rating was placed on this thread with replies

Not a fan of gui as always so here's the builder's screenshot.

Spoiler ([Click to View](#))

[img]http://img3.imageshack.us/img3/6875/13229476.jpg[/img]

Note: Tell me if the builder looks complicated, i don't really know how should i put them, too many encryption methods.

Note: Scan on Nvt after encrypting and post the outcome here.

Feedback would be happily welcomed.

??\$??? - September 16, 2009, 1:48 am

me trying it lets hope for best

gurusharan1247 - September 16, 2009, 1:51 am

Welcome bro.

CyberHacker™ - September 16, 2009, 2:01 am
is it 100% FUD ?

iDecrypt - September 16, 2009, 2:08 am
hey i got a question after crypting the file size goes to like 17 mgb's the original size was 4 :(

H3LL - September 16, 2009, 2:08 am
file size will *4 of it original size.

Quote:is it 100% FUD ?

It's runtime FUD, but i'm not sure how 100% FUD looks like :P

gurusharan1247 - September 16, 2009, 2:20 am
now avira is detecting it
but still thanks

<http://scanner.novirusthanks.org/index.php?session=6974491799166720541362611869318175190519864659>

H3LL - September 16, 2009, 2:39 am
It got detected at first, then i removed a few stuff and avira stop catching it. Later i binded it with mspass from nirsoft and it was fud.

Well probably there's a few lines that gets detected after encrypting.

Sikandar - September 16, 2009, 3:20 am
....written in vb.net???.....thankz!

H3LL - September 16, 2009, 3:25 am
Nope, it's coded in C. I would put on a simple shirt for it if it was in VB instead of naked.

BlueMelon - September 16, 2009, 3:39 am
FUD exept for Avira!
Thanks man! :)

kiow - September 16, 2009, 3:45 am
I crypted a Poison ivy server, nod32 doesn't detect it on scan but when I execute it it detects a file in the temporary folder and stops it..how can I get around that?

H3LL - September 16, 2009, 4:05 am
Like i said, it's not scantime fud it's just a simple program before i release the actual one. Sorry kiow can't help you.

BlueMelon, i'm going to work on that.

mana5olia - September 16, 2009, 4:12 am
@H3LL , well done mate, will download it once i am home.

adjara2 - September 16, 2009, 4:14 am

Binder Detector: File is possible binded with malware, do you want to infect us?

a303 - September 16, 2009, 4:16 am

Good work H3LL. Keep it up.

H3LL - September 16, 2009, 4:24 am

(Sep 16, 2009 04:14 AM)adjara2 Wrote: [\[CITE\]](#) Binder Detector: File is possible binded with malware, do you want to infect us?

I'd reply your comment since you're a noob. Basically my builder contains a stub, and that stub is used to extract the binded malware of the users. So it would be detected since it is under the builders resource.

Thanks pretty much to the rest of the members.

pal62 - September 16, 2009, 4:26 am

Thanks for your share..appreciate it.

jijip - September 16, 2009, 4:46 am

Thx, works, but is detected by one ^^

H3LL - September 16, 2009, 8:14 am

No you don't, probably something wrong with your isp.

Gizmo - September 16, 2009, 8:20 am

Sorry for this question, but what you mean with ISP?

H3LL - September 16, 2009, 8:28 am

isp - Internet Service Provider

by the way, did you scan the right file?

xyz iz lawless - September 16, 2009, 8:53 am

how the fuk do i use this i put the name of the exe i want to crypt and it just says error please check malware wtf

H3LL - September 16, 2009, 9:04 am

Make sure the malware is in the same directory as the crypter dude.

Gizmo - September 16, 2009, 9:12 am

(Sep 16, 2009 08:28 AM)H3LL Wrote: [\[CITE\]](#) isp - Internet Service Provider

by the way, did you scan the right file?

I ve crypt my server with your program and scanned that file (scan is already posted by me)

xyz iz lawless - September 16, 2009, 9:13 am

(Sep 16, 2009 09:04 AM)H3LL Wrote: [\[CITE\]](#) Make sure the malware is in the same directory as the crypter dude.

hmm tried this but still no joy!! maybe if i make a file on my desktop put ur crypter in it wiv the exe and try again??

H3LL - September 16, 2009, 9:14 am

I think you forgotten to put in the extension (.exe)

@wunnab, i think you scanned the wrong file, why will avira not be detected suddenly and 2 other av caught it?

xyz iz lawless - September 16, 2009, 9:15 am

ok i got it thanks dude

Gizmo - September 16, 2009, 9:16 am

(Sep 16, 2009 09:14 AM)H3LL Wrote: [\[CITE\]](#) I think you forgotten to put in the extension (.exe)

Wowowow, sorry dude my bad!

Really sorry

H3LL - September 16, 2009, 9:17 am

(Sep 16, 2009 09:16 AM)wunnab Wrote: [\[CITE\]](#) Wowowow, sorry dude my bad!

Really sorry

No problem mate.

xyz iz lawless - September 16, 2009, 9:35 am

thanks dude 1/24 will spred this l8r!!! do u have a private crypter thas fud? i got sum cash from scamming a few things here and there how much for a fud????

H3LL - September 16, 2009, 9:39 am

I'm still building a more advanced crypter. Not selling a crypter since i'm a beginner in it. =)

xyz iz lawless - September 16, 2009, 9:39 am

Project coming - Binder + Crypter. ^estimated price: 50usd

why do i need a fud binder? i have never used one b4 and still had gr8 results spreading

(Sep 16, 2009 09:39 AM)H3LL Wrote: [\[CITE\]](#) I'm still building a more advanced crypter. Not selling a crypter since i'm a beginner in it. =)

ok cool i would love to know how to make my own but i cant find a gud tut explaining how, i can use vb2008 but only basics like makin a phisher etc maybe i should learn cplus

H3LL - September 16, 2009, 9:46 am

Well, the functions you're going to use isn't that many just a few simple ones. The hard thing about it is the algorithm.

Gizmo - September 16, 2009, 2:04 pm

You just have to fill in the server name?

It gave me an error. Check malware or sumt, but i'm sure I typ right.

krzyflipx - September 16, 2009, 2:05 pm

Hey man props to you good crypter! 3/41

Make sure your malware is in the same directory!
And also, it requires .exe after your filename.

Scantime FUD means that it is FUD during scantime. Runtime FUD means that it is FUD during execution. Your question, no.

Use decimal + blaise only if you've paid for the app... basically, press 1 if you've downloaded from this thread

***eX** - September 21, 2009, 3:49 am

hey it would be great if you can create a command line version of this cryptor. I just hate GUI interfaces. lawlz.

WOA! sorry. i wrote that before it even finished downloading. GREAT JOB!!!

H3LL - September 21, 2009, 3:56 am

(Sep 21, 2009 03:04 AM)PMPNMOTION Wrote: [\[CITE\]](#) so you mean i can actually crypt it. and then crypt the new file? i will try this but everytime i've done that before i corrupted the file but i will try =] thanks for the reply

I tried dual crypting my file and it worked.

Quote:Use decimal + blaise only if you've paid for the app... basically, press 1 if you've downloaded from this thread

Yeap, but i haven't sell it yet too because it's just a scantime crypter. I don't think people will buy a crypter that only bypass scantime.

Quote:WOA! sorry. i wrote that before it even finished downloading. GREAT JOB!!!

No problem, i thought you wanted the program to pass arguments.

Xperiment - September 21, 2009, 4:10 am

not FUD. avira detects it. thanks anyway.

***eX** - September 21, 2009, 4:11 am

would you know how to make it executable from cmd? like the way you open Perl. cd c:\perl or something along those lines.

H3LL - September 21, 2009, 4:13 am

(Sep 21, 2009 04:10 AM)Xperiment Wrote: [\[CITE\]](#) not FUD. avira detects it. thanks anyway.
Scan report please?

Quote:would you know how to make it executable from cmd? like the way you open Perl. cd c:\perl
or something along those lines.

I don't get what you mean.

Kwoa - September 21, 2009, 10:39 am

Great Crypter

My stealer was 31/41 After crypt 0/41 On virus total !

PMPNMOTION - September 21, 2009, 2:51 pm

ok so yesterday i crypt it once. and it was 1/23 detected by bitdefender. after taking your advice and
crypting it again 6/23 ? any input? or is it just slowly becoming not FUD

EDIT: for some reason if i dual crypt it becomes more detectable. i redid it and only crypted it once
and i get 1/23 bitdefender. good enough for me =]

EDIT: lol im an idiot its because i binded it after then tested it.

H3LL - September 21, 2009, 4:08 pm

(Sep 21, 2009 10:39 AM)Kwoa Wrote: [\[CITE\]](#) Great Crypter

My stealer was 31/41 After crypt 0/41 On virus total !

1 - Great

2 - Fag for using VT

3 - I don't care much.

superelite - September 21, 2009, 5:36 pm

thank you very much . made my file undetectable =D on novirusthanks
seriously I'm loving the cryptor ! where could I get a private one at >?

H3LL - September 21, 2009, 9:36 pm

The public crypter is very good for now, even if it is detected i'll get it FUD. However it is only for one
encryption.

Maitkaa - September 23, 2009, 12:31 am

how can i use it ????

H3LL - September 23, 2009, 1:23 am

First you need to know what is a crypter.

The instructions are easy, select Encryption Type 1 and then insert your malware name(make sure it is in the same directory as the crypter), remember to include .exe, then put a new filename for your malware.

z1lla - September 23, 2009, 2:50 am

(Sep 22, 2009 02:56 AM)H3LL Wrote: [\[CITE\]](#) I don't really care, it's just a simple release well u should care bro and keep it FUD?so take down that link?

(Sep 23, 2009 02:50 AM)rodster Wrote: [\[CITE\]](#) well u should care bro and keep it FUD?so take down that link?

Don't worry it would be months before a program actually gets flagged.

Edit: besides that, i got tonnes of stubs that can be programmed easily. I didn't know a scantime crypter was this easy. I just have to mix few algorithms and voilla a new stub comes out.

PwNaGe™ - September 24, 2009, 12:09 am

i wonder how amny newfags scanned this on virustotal :/

H3LL - September 24, 2009, 3:52 am

Update finished, link will only be posted when people actually knows it is detected @@

LittleFighter™ - September 24, 2009, 4:01 am

i know itz detected
itz detected by norman

H3LL - September 24, 2009, 4:11 am

No one here actually realises it is detected except you(second poster), i'll post it some time later. 1 detection isn't really much a problem i guess.

Try dual crypt =) Maybe big in size but... it's up to you. 1/23 isn't much i guess.

Will be released in less than 24 hours

GOODJOB TO H3LL
Not too fast >< it's just stubs for scantime. I'm not yet ready to go for runtime cause i've other stuffs to do first.

LittleFighter, it's not runtime fud. You want to purchase the private stubs?

H3LL - September 27, 2009, 4:48 pm

Updated to version v1.08

so u now selling only?

H3LL - October 13, 2009, 2:12 am

Yes, or you can say i stopped this project for now. Would wait until i get a hang of runtime crypting first only i'll continue.

LittleFighter™ - October 13, 2009, 2:12 am

(Oct 13, 2009 02:12 AM)H3LL Wrote: [\[CITE\]](#) Yes, or you can say i stopped this project for now. Would wait until i get a hang of runtime crypting first only i'll continue.

ok

HeartHacker007 - October 14, 2009, 12:13 am

If you know which AV your victim uses and if you can make your server FUD with just that one AV, and you bind your server with a file of size greater than 20 MB, he cant see what other AV's say as NVT or VT has limit of 20MB maximum file size... So... That will help if somebody doesn't has Avira...??

KLGopes - October 14, 2009, 6:34 pm

Can someone tell me how can I crypt the file and let the old icon used?

When I crypt it to .exe it always comes with the executable icon, nobody will open it that way..

Idk how to change the icon or something using this crypter, is it possible?

newbie223 - October 14, 2009, 8:24 pm

hey if i use rc4 algorytm isit scantime or will it be runtime?

DarkForce - October 21, 2009, 6:31 pm

well i like to try this want out .

rekt_ - October 22, 2009, 2:33 am

Lol dude, when you open the console it is so buzzy... I opened it like 4 times in a row before even reading the opptions.... >_<

Cool, and I just scanned my outputted exe and it is not detected anymore ?

Thanks for this bro.

Gizmo - October 22, 2009, 7:25 am

Thank you very much you doing this for us, I really like this. Thanks!!

Anubis - October 22, 2009, 8:51 am

when i first time crypted my server it worked....tested...but now...when i try to crypt a file...it says SUCCESSFULL but when i try to test it it doesnt work...w0ts tha problem...THANX 4 DA CRYPTER H3LL

noahsh - October 22, 2009, 8:57 am

thank you why i didnt see this thread beforeee:(

coolio this looks pretty sweet :) ahaaa

coolio this looks pretty sweet ahaa :DD

mullinupp - July 27, 2012, 4:07 pm

thanks for shareing so many greeat tools from your site thanks once again

P4R4DiSi4C - July 27, 2012, 4:19 pm

This is great ;) good work

You really work hard

t-n-t- - September 10, 2012, 11:02 am

great share got to learn this thanks

kafantrei - September 11, 2012, 10:53 am

i dont understand how to use it, please any1 fud my rat i will pay them add my skype: katie.me3

MythLegend - September 12, 2012, 2:34 pm

Gona check it out...lets see what happens..thanks...

Short

tomsins - September 22, 2012, 11:10 am

Hi all. I'm brand new in this, but i'm trying hard :) Does anyone know how to use the T3c4i3 crypter ??

I have downloaded the sniperspy program. And i just can't make a propper file to send out.

I just signed up on a dateing site, and there i all scammers it seams. So it would be great to give them somthing back to suck on :) Have not been fould but they are taking it very long.

Thanks in advance

Happy thoughts

Tom

Can i get it please?

Thanks in advance .

Swissless - July 10, 2013, 1:08 pm

now avira is detecting it

but still thanks

This thread is almost a year old lol.

Ofc AV's are detecting it.

::EDIT almost 4 years old

hello to the creator and for all the members

this is good to fud zeus ? becouse u know that zeus it`s so sensible to fuding?

SIM-1673779 - *July 11, 2013, 5:11 pm*

link is dead. please update/ add a new one

lordwhite - *July 26, 2013, 12:06 am*

I agree, thread is old but the tool it provides needs to be updated/re=uploaded to make the software match the title "FUD". Grr, I always catch the good threads when it's way too late for the tool to be of any use...
