Thread: [\[TUT\]How to hack pyramidfiles.com downloads | Fast and multi downloads](#)

MegaHackerOne - July 13, 2011, 10:09 am

Hello Hackforums,

Today I'm going to show you how to download from Pyramidfiles.com without waiting the free download counter and how to download multiple files,

Download files without counter

For this, you will need firebug, it's a firefox add-on: [getfirebug.com](#) or just google it,

first of all, go to your pyramidfiles file you want to download

ex: http://pyramidfiles.com/j3u0n5v0obj7/SRBL-1469_by_r3z4prof.part11.rar.html

then now click "free download" or "slow download" or something, then wait for the countdown timer to show, now when the timer shows up, right click and click "inspect element", then you should see the counter in the source, replace it by "0" now scroll to the bottom, then you should see your "download now" button.

Download multiple files without waiting for the download to complete

Ok, so now you've done that, you still want to download other files but it restricts you to do parallel downloads, what you need is a proxy site

hidemyass.com or other proxy sites, the best would be that you get a list of proxy from HF and configure it on firefox, PM me for help,

now browse the file on the proxy and you can download it, so you have 2 running downloads at the same time without having to wait some minutes.

Credits: my brother for finding this by downloading movies everyday. He messed with firebug and proxy ad found this

I think it's the first tut about Pyramidfiles as it's still not very well known,

enjoy ?

Oxydit - July 13, 2011, 10:10 am

thanks BRO xD! , will try it soon :)

no problem bro, I'm here for daily tips

SCarson - July 13, 2011, 10:11 am

It's alright, thanks for the contribution. Kinda simple, and prob worth just waiting the limit time unless your a hardcore user. xD

xD well my bro does like many download because it'll end faster and we both watch movies on the

little laptop
lol Poor guy's stuff
