Thread: [\[4/5\] Microsoft Windows Vista Gadgets Code Execution Vulnerabilities](#)

**Omniscient** - August 14, 2007, 2:00 pm

Three vulnerabilities have been reported in Microsoft Windows Vista, which can be exploited by malicious people to compromise a user's system.

Be sure to check if your system is missing security updates or have insecure applications installed:  
[http://secunia.com/software\\_inspector/](http://secunia.com/software_inspector/)

Feature Overview - The Secunia Software Inspector:

- Detects insecure versions of applications installed

- Verifies that all Microsoft patches are applied

- Assists you in updating your system and applications

- Runs through your browser. No installation or download is required.

How did you manage to dig up this thread?

It's that old, that it pertains to Vista, and not Windows 7.

i guess im just that vintage :D

-boredom actually.

Fair enough.

I'm just at a loss as to how you managed to find this, after all this time :)
