This one is old!

I originally posted this thread to get some money for my girlfriends birthday, which has already passed. I've made more then I expected and I have to say thank you to anyone who wanted me to make them a website.

Now I have a team of two people. We work fast and can do almost anything you want.
Web Design

HTML/CSS (Including the good stuff such as HTML5/CSS3)

Graphics

JavaScript/jQuery

Wordpress/Blog (If the site is anything but a static, basic website, I'll put it on Wordpress)

Forum (MyBB, Modify or custom theme)

User Control Panels

Custom Web Apps

Anything Else just ask!

I'm a great web designer. I create simple, readable, quality sites that goes straight to the point. I've worked for many clients already... for example, I even made a website for Omni (Though he hasn't used it yet. What a busy man!). And almost every client, including Omni said they loved my work.

Here are some examples of recent work:

Spoiler [\(Click to View\)](#)

I am fairly cheap, considering the quality of my work. For a basic 1-3 page website, it'll be around \$15-\$25+ depending on what you need done. Though if its more, like a wordpress/blog or cms kind of site, then the price will go up.

If your looking for a simple website for your program (For instance, your Crypter) I'll make a great website for you.

Please reply or PM me with the following information:

Quote:Website Name:
Website URL:
What is the website about: (example: website for your crypter. Provide much info you can)
Theme Colors: (Colors you would like on the site or shade... dark or light)
Links to other similar sites/designs:
MSN: (If you have on easiest way to talk)

xvisceral - July 14, 2011, 11:12 pm

I don't need any web design, but that's really nice how hard you are working for your girlfriend and I know how that is. When I first met my girlfriend, I had \$11 to my name and I had to borrow gas money from her. Ouch.

PM me if you don't reach your quota, I'll give you \$11.

Thank you so much Omni.

Alright, today I'm gonna start working. PM me if you want a website. It might take a bit longer due to the PM's I've gotten.

No sorry, I only take paypal.

CEO_MONSTER - July 17, 2011, 12:15 am

can you make me something like the twiend site?
with new design n some free script?
probably with facebook app too
let me know
ied be interested if so :D (if u code then :D)

Se7vn™ - July 17, 2011, 5:27 am

mate, do u create & code vbulletin theme , if yes then PM me !

proXace™ - July 17, 2011, 6:57 am

Ever heard of OMP3? Google it.

Anyway, I need a design made for a new project i'm working on, don't expect you to be able to code the design but if you can even better.

Willing to spend about \$40 if you can do it for me?

You got Omni's mark of approval, and by the looks of your previous work you have talent.

PM me if you can.

proXace™ - September 16, 2011, 4:59 am

Old thread here.

<https://hackforums.net/showthread.php?tid=797521>

Most of what your after is here.

What is the website about: anime streaming and downloads

Theme Colors: dark

Haven't thought about any name / domain yet, but if you can do it better then the site posted within my old thread, and a price. PM me.

1 last thing. Do you do the GFX as well?

Valiant - September 16, 2011, 7:25 pm

8bits - October 11, 2011, 5:41 am

I've been really slow lately doing work. I had a lot going on. I am currently finishing up valiant's site and then take a break and will reply when I'm ready.

Dorsch - October 12, 2011, 12:01 pm

I will pay you 5 dollars to help me tweak my already coded website to allow my CPALead to automatically deposit the websites currency into the users account. I had it working somewhat but it gave the coins to all users upon completions of the CPA instead of one, so at this point it should literally take you <1 minute for 5 dollars pay.

Valiant - October 12, 2011, 11:05 pm

He's been maintaining contact with me, so good communication. I'm just waiting for the work now.

///M - October 30, 2011, 6:26 am

Website Name: VFRFlight.co.uk

Website URL: www.vfrflight.co.uk

What is the website about: It is about VFR flying, all things VFR, so there will be a map on one page (i already have the map) listing all grass airfields in the UK, there will also be things about how to get your Private Pilots License. Just everything about light aircraft/propeller aircraft.

Theme Colors: Light, thinking sky blue and clouds kind of theme? Would be cool to have a light aircraft as the logo dragging a banner behind it with the site name on it.
