Read the 1st post before posting. He says he hacked server root.

Why do people always put their emails on deface pages? I mean it makes sense if you want people to know who did it and how to contact them, but isn't that just giving them another way to tack you if they wanted. Granted the email has fake info and I guess you could log into it through a proxy

Or is there another reason?

You don't know who i am. Why start a flame. i lol'd + idk why your calling me milw0rm boy, ive seen some of your posts, alot of people claim you make free sites and claim you "defaced" them.

EDIT: I was simply asking why would anyone deface a rooted server. If you root something without the owner knowing. They will never know, or at least no for a while. You can do ALOT of stuff with a rooted box.

Shulc - September 19, 2009, 10:41 am
um no fail its back to normal
i have a much worse script but i can't use it to stupid do hack a site.

2 Things to ask you.
1. How old are you? Don't answer exactly but e.g 6-12 ,, 13-18 ,, 18 - 30 ,, 40+ ?
2. Do you have tutorials of hacking websites your way? There are so many that would like to know I guess.

Question to the public
-Why are so many arabic people hackers?

T3eS I think you are one of the actual better hackers of HF.
