You don't need to run it Sandboxed. You don't even need to download it if you are just going to blame. It has no virus. Go scan it with every scanner. Nothing will happen

Whats not working? When you freeze some one they dont automatic log out.. THEY need to log out first and after that if you send to many attempts their account will even be mass-blocked so they can never log-in only if they e-mail microsoft. I ran it through Sandbox, but I can't understand what Sandbox says half the time.. It's like it was coded by some Harvard rich guy.

Don't get me wrong babe, it's a great idea.. I love the layout.. But, most of it doesn't work.. And I don't know if I'm infected or not. So.. Yeah. I deleted it.
