? Awesome Password Stealers working with latest versions.

? Emails ChatLog Stealers. Now steal conversations from your slaves.

- MSN Chat Log Stealer
- Skype Chat Log Stealer
- Yahoo Chat Log Stealer
- Digsby ChatLog Stealer

? Generates Unique output everytime.

? Encryption on your sensitive details.

? Polymorphic Encryption on Strings and variables to keep it fud for longer. (Not fud anymore but you can use a crypter)

? Uses Dynamic API's with polymorphic encryption, which gets difficult for AVs to tag codes as virus.

? Codedom Based. No use of Stubs.

? Melt File.

? Add to Startup. You only need this feature if you want to check for updated passwords everyday on slave's computer.

? Small Server size.

? NO File is dropped, in the temporary folders to arouse suspicion.

? Icon Changer.

? Built in Assembly Editor to change info of server. If not used HCStealer randomizes assembly info itself.

? Spawn Fake Error.

? Building a Server has never been easier than this. Designed to build servers for the most naive users.

? Requires .net framework 2.0 which is available in most PCs.

? Complete UAC Bypass.

? PHP Logging, uses database to store all your fetched passwords.

? Tested and 100% working on Windows 7, XP. 32 bit and 64 bit.

Password Stealers :

? Windows Live Messenger all versions.

Recovers passwords from Windows Live Messenger all versions including 11.

? Firefox Stealer 3.5, 3.6 and 4.0 + All Betas

Recovers passwords from mozilla firefox and decrypts them. It automatically checks for Firefox versions and fetches data automatically. It can recover from Firefox v4.0 betas which not many stealers can.

? Google Chrome Latest Version

Recovers passwords from google's Chrome webbrowser.

? Internet Explorer 7,8 Registry Passes

It can decrypt passwords from Internet explorer version 7, 8 not yet tested on 9. Also recovers hashes of unsaved passwords.

? Opera Webbrowser

Recovers passwords from Opera wand.dat and decrypts them.

? Yahoo ETS

Yahoo ETS is yahoo messenger passwords in an encrypted format. Yahoo ETS is impossible to decrypt as supplied by sources, but you can try your luck using it to your benefit.

? Steam Username

Steam changed the way passwords were stored before. Now it doesn't save passwords in clientregistry like before. So its difficult to fetch passwords. But HCStealer recovers the Steam Username and this can help you get steam passwords, since most people use same passwords to store along with steam.

? Windows Serial Key

Fetches Windows Serial Key and which OS slave is running.

? Pidgin/Gaim

Pidgin is an AIO internet messenger, and many people use it. HCStealer fetches passwords from pidgin.

? Paltalk

AIO IM which HCStealer fetches passwords from.

? FileZilla

A very widely used and famous FTP client, filezilla. HCStealer recovers passwords from Filezilla.

? DynDns

A dns client which manages dns of a user. it steals from DynDns. You can get some valuable dns with rats or booter zombies.

? NO-IP version 2

Another dns client which manages dns of a user. HCStealer steals from No-ip v2 client.

? IP Address, OS, PC Name of slave.

Fetches information like IP address, operating system, PC name of the slave with each log.

ChatLog Stealers :

Emails you the "SAVED" chat archives from slave's pc.

? MSN Conversations

? Skype Conversations

? Yahoo Conversations

? Digsby Conversations

It steals Firefox 4

no, it doesn't.

Submariner - July 19, 2011, 6:38 am

is it updated version? its have been posted before...

?ndo - July 19, 2011, 6:45 am

Thank a lot mate , i really wanted a ncie stealer :D

Samira - July 19, 2011, 6:58 am

I will try this, thank you.

I will search for virus before, of course.

Seems clean, but builded server doesn't work for me: no email sent [and email credentials are right :)]

luigiman - July 19, 2011, 7:13 am

I DLed gonna attempt to get back in the hacking biz for a day or two

IDK if its infected but post ^^ says its clean

Br4v0 - July 19, 2011, 7:15 am

blackshades stealer is better anyways i will try as its awesome and free so thanks :D

Search for an istealer tut.

It's almost same.

Also, please note this stealer is FUD! Not like iStealer.

this aint the best but for me its in top 10 gotta love this one though thanks bro

Df4c3r.exe - July 19, 2011, 9:22 am

Great Man, Awesome !! Will try this and post again my review.

Kev Hart - July 19, 2011, 9:28 am

do i need a website? or is it enough with just an ftp? :)

cheers.

PedroDJ - July 19, 2011, 9:30 am

website for index.php [short]

? Lollipop ? - July 19, 2011, 9:30 am

Now this is what i call a good stealer ;)

Stenography - July 19, 2011, 9:33 am

What about firefox 5 ?
can it steal the logs of it ?

Da Tweekaz - July 19, 2011, 9:41 am

works fine! thanks "Blue Screen of Death"!

mariorossi987654321 - July 19, 2011, 9:43 am

Firsty, I'd like to thank you very much. Secondly. if I test this on myself, is it safe?

jessman420 - July 19, 2011, 11:46 am

Thanks for this, it looks nice

Glitched - July 19, 2011, 11:55 am

looks nice, but if it is not FUD I'd use something that is.

Capt?in - July 19, 2011, 11:57 am

No matter how hard you try, iStealer will still be the best ^^

That file is a chat logs from yahoo/msn.. etc

no idea how to open it. probably with the program it comes from.

(Jul 20, 2011 04:27 AM)Spitbull Wrote: [\[CITE\]](#) When I infect myself I get a .db file sent to my e-mail, can you tell me how to open this file?

It's a database file. Use wordpad to open it and read it, but it'll be all ugly and you probably won't understand it. Otherwise Access or maybe Excel should work.

**** JIT Debugging ****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging

enabled.

For example:

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.
