I'm not really a signature person , more like Web and Graphics , but the CMYK is a very sick poster , the UrbanLYF looks like a real nice card , the portfolio looks nice , I just don't like the background . And with the Coding part of your service , you use (X)HTML , CSS , jQuery, or JS ?

Hustler - July 19, 2011, 4:18 pm

You make some cool ass stuff.
