Thread: [WTFUD - Online Crypter \[Coded in Assembly | 3-10kb stub | EOF Support | Transformation Matrix\] UPDATED](#)

aadster - July 20, 2011, 1:43 am

- + Our service provides you with the worlds smallest FUD crypter.
- + We use an advanced technique known as transformation matrix.
- + This transformation matrix changes the order of each byte in your program to decrease the rate at which the file is detected.
- + You can think of this like scattering puzzle pieces in a random order.

WTFud uses an Enterprise Level Cryptographic authentication system similar to webmoney. In order to access your account you must generate a unique one time token. This token can only be used by you and you alone with the pc it was generated on. Because of our challenge response system not only are we able to stop people from sharing their accounts while creating longer FUD times, but we're also able to prevent unauthorized access to your account. Another unique feature of our crypter is the stubgen. Our stubgen generates a new unique source each crypt using our code pool.

There are several benefits of using our ASM crypter.

- + Faster Updates
- + Small Size (average 5 kb, 3-10kb)
- + Great For Exploit Packs
- + Use less bandwidth on mass download
- + Quality service from an ASM coder of 7 years.
- + Absolutely no dependencies!
- + Nearly a 100% execution rate!
- + Compatible with nearly every type of binary!
- + Unicode Support
- + Argument Support

- +\$25 (one month)
- +\$50 (three months)
- +\$80 (lifetime)

To buy, PM [?????!](#) or add the coder on MSN: wtfud@live.com

If you need me contact information just hit the about page.

Regards,

[R]eaper - July 20, 2011, 1:45 am

Vouch for aadster and his products, he is very legit. (no need for vouch copies as he only sells quality products.)

bourd - July 20, 2011, 1:48 am

Good luck with this. Although there are lots more now.

PedroDJ - July 20, 2011, 1:50 am

Great job: good luck with the sales :)

Kyniem - July 20, 2011, 1:54 am

Vouch for aadster,,,awesome guy!

Phuziion - July 20, 2011, 2:00 am

What is "10) Argument Support"?

For \$25, I could buy mehself a executable crypter bro.

[R]eaper - July 20, 2011, 2:05 am

Try and get a asm coded executable crypter for 25 bux.

????? - July 20, 2011, 2:08 am

(Jul 20, 2011 02:00 AM)Bad Meets Evil Wrote: [\[CITE\]](#) What is "10) Argument Support"?

For \$25, I could buy mehself a executable crypter bro.

Argument support means for example you have a ssh client that auto connects to ip via parameter. ssh.exe 127.0.0.1. The crypter supports such parameters, they're needed for Zeus and some other malwares.

Btw I could've coded a ASM crypter client easily in Delphi. Online is much better :)

[R]eaper - July 20, 2011, 2:54 am

(Jul 20, 2011 02:13 AM)????? Wrote: [\[CITE\]](#) Actually, 001ramon, I forgot to mention I coded a Crypto challenge response system for the crypter which uses a desktop executable. It's the only way to access the panel.

Look at Token.zip on the site ;)

Already downloaded it and playing around with it haha :)

Forgot to mention, might wanna post a Virus Scan of the files, just so its more trust worthy :)

Hakurei Reimu - July 20, 2011, 3:06 am

I remember when he posted about this! Can't believe it was this delayed, gonna buy right now :D

Added the MSN on the site.

SIM-595622 - July 20, 2011, 3:08 am

You should have mentioned this project yesterday on opensc.

Im buying as soon as I get out of the shower.

Big ups bro!

Kyniem - July 20, 2011, 3:36 am
cant wait for plimus....)

[R]eaper - July 20, 2011, 3:57 am
Already a suggestion :P, if you have time maybe add a scan4you engine or something?

Dex - July 20, 2011, 6:32 am
Vouch for ckenen, quality coder. Buy now guys while you can! Best crypter on HF thus far!

Exal - July 20, 2011, 8:51 am
This looks amaizing, good luck with sales.

????? - July 20, 2011, 10:01 am
I just replaced the engine, added some more methods to increase FUD time. The new engine seems to have caused 1-2 new dets working on it now then sending copies out.

Will post a video of the crypter after.

drizzle - July 20, 2011, 11:49 am
^^ Another vouch here, this is great shit, aadster and the devs definitely know their shit. Haven't seen a crypter like this.

SIM-595622 - July 20, 2011, 12:15 pm
Paid, just waiting for ????? to finish the fud.

D??M! - July 20, 2011, 1:53 pm
Easily going to be the #1 crypter on Hack Forums. Love that it supports unicode as well.

iDarky - July 20, 2011, 2:12 pm
PM me your LR, will buy lifetime. (once I get on my PC)

I hope it's a actually worth \$80, unlike the other shit I buy :]

????? - July 20, 2011, 2:45 pm
Stay on topic.

LR: U2133122

freeware - July 20, 2011, 2:47 pm
Am i considered trusted in terms of using paypal? cause thats all I have lol

????? - July 20, 2011, 2:52 pm
I setup plimus, just need to add the links then you can order with paypal.

Regards,

Status - July 20, 2011, 2:55 pm
Sorry, I'm not too familiar with crypters but I have a question.
I know some crypters use stubs to generate an FUD file, so does this one too?

If so is everyone using the same stub?
I just want to know if my crypts will stay FUD for a good time.

????? - July 20, 2011, 2:58 pm

No every users stub is different. It uses a remote stubgen which randomizes and compiles a fresh source each crypt :)

Dex - July 20, 2011, 2:59 pm

(Jul 20, 2011 02:55 PM)Status Wrote: [\[CITE\]](#) Sorry, I'm not too familiar with crypters but I have a question.

WTFUD uses a code pool to generate a new stub every time. This will guarantee your product FUD from a long time. Buy this, it will guarantee you a FUD and it works with basically everything!

Status - July 20, 2011, 3:10 pm

Thanks both of you for the detailed info.

Just to be sure though (since you said product >.>) , this can crypt BlackShades right?

phr0zt - July 20, 2011, 3:10 pm

good luck with sales! looks like a HQ product =)

?D?vi??c?t?™ - July 20, 2011, 3:14 pm

If all the features and all other things above are true then we just got a wonderful coder to HF.

Goodluck with your sales.

Add an scanner that'll scan every x hours :o

Status - July 20, 2011, 3:17 pm

except you can't code asm ? only skid language delphi, its worse than .NET

xor - July 20, 2011, 4:15 pm

Vouch for aadster, he is rly a good GUY !!

A sebyno friend ;)

?Petrovski - July 20, 2011, 4:59 pm

This seems like a very interesting concept (The ASM) that is i will look into this

daemon10 - July 20, 2011, 5:01 pm

is anybody on MSN support for this ?

Eleg?y? - July 20, 2011, 5:32 pm

I am going to buy this soon :P.

Dex - July 20, 2011, 5:34 pm

THIS is the crypter to buy folks! Will guarantee a good buy and will save you money for a long time! Buy up on this, it's an excellent deal.

Arron XR - July 20, 2011, 5:34 pm

looks really nice will be looking into this more tomorrow. :) GL

masterjippo - July 20, 2011, 5:52 pm

Looks like a great product. Might invest in this soon :-)

Best Regards

Nawk - July 20, 2011, 5:54 pm

Vouch! for this skuxx seller, legit products right hur.

Kill?Muvz - July 20, 2011, 6:28 pm

how long did this take to code? D:

vmartin - July 20, 2011, 6:37 pm

As long as this surpasses Damla Protector/Online Crypter..

Count me in once I get the funds.

????? - July 20, 2011, 7:59 pm

Well, on some files we get kazy dets. I found a way to bypass but I'm not satisfied with it so I'll need another day. For now all accounts are activated.

scan report: http://scan4you.net/result.php?id=a7d8e_fia2f

Plimus buy now buttons added to the site!

For those who purchased visit www.wtfud.com/activate.php and activate your account

Regards,

Dex - July 20, 2011, 9:37 pm

The crypter works flawlessly, jump on it guys, it's a great deal! Also, add deadly5@live.com for support, I'll be on most of the day EST.

Kyniem - July 20, 2011, 11:16 pm

Bought it through Plimus, how to get HWID ?

Eleg?y? - July 20, 2011, 11:38 pm

. Download the challenge response system on the home page and the second tab and the second row of fields display your HWID.

pr0t0typ3 - July 21, 2011, 1:34 am

A big vouch from me. aadster is a very legit guy and if he decided to sell this software it has to be legit too !

yazzy - July 21, 2011, 2:29 am

Pretty amazing and looks promising.
Willing to buy this very soon.

Dex - July 21, 2011, 10:01 am

Available for support and/or pre-sales questions now! Add deadly5@live.com

sinbad469 - July 21, 2011, 11:17 am

Will this work with sniper spy? If not what would you recommend thatbis similar? I'm ready to buy... Good luck and thanks.

Dex - July 21, 2011, 11:20 am

(Jul 21, 2011 11:17 AM)sinbad469 Wrote: [\[CITE\]](#) Will this work with sniper spy? If not what would you recommend thatbis similar? I'm ready to buy... Good luck and thanks.

I'm assuming sniper spy is a keylogger? Which is what it looks like. You can take a look at any keylogger available on HF's marketplace or a free one available in Hacking Tools under keyloggers. Chances are this will work with sniper spy but if it doesn't, you can always use another keylogger.

sinbad469 - July 21, 2011, 11:32 am

Thanks for the quick response... Going to buy it now and try it out. I'll let you know how it works out. Thanks again! Best of luck to you...

PMed you back, thanks for the interest

Wizzay - July 21, 2011, 12:04 pm

Has this been tested and proven to work with blackshades?

?D?vi??c?t?™ - July 21, 2011, 12:14 pm

Can anyone claim that this is working with the common malware :?

Dex - July 21, 2011, 12:17 pm

Answering the above, since the crypter is coded in assembly it is compatible with basically every type of binary. If you are still skeptical we will run tests on all major malware in the few upcoming days. Thanks for the interest!

Wizzay - July 21, 2011, 12:22 pm

Yes I have no doubt its good, but a test + confirmation would really make me feel easier as I have bought stuff that only work with certain settings and shit. What I need is to use ANY setting I want on blackshades/cybergate etc and this crypter work regardless of the settings of my bs, if that works. im a customer!

Forrest101 - July 21, 2011, 12:24 pm

(Jul 20, 2011 02:00 AM)Bad Meets Evil Wrote: [\[CITE\]](#) What is "10) Argument Support"?

Yea isn't that pretty fast?

DeadlyVermilion - July 21, 2011, 6:06 pm

(Jul 21, 2011 06:04 PM)botnous Wrote: [\[CITE\]](#) Yea isn't that pretty fast?
They're generic detections (Not exactly hard to get rid of), I helped him get rid of them though,
Every crypter has a stage where it gets a few generics so its better earlier than later.

[R]eaper - July 21, 2011, 6:51 pm

(Jul 21, 2011 06:36 PM)Variable Wrote: [\[CITE\]](#) Why would it get these detections so quickly though?
Because idiots upload to Virustotal is my guess.

im in the same boat. i want to buy... pm me when you guys get the dets taken care of

FuzzyInteger - July 22, 2011, 8:12 am

Someone can tell me if this crypter are able to Bypass KIS ? Bitdefender Proactive? outpost? norton sonar? DataExecutionPrevention?

????? - July 22, 2011, 12:02 pm

(Jul 21, 2011 05:49 PM)Variable Wrote: [\[CITE\]](#) You already have detections? ?

No, the stub was and is FUD. There were some unforeseen circumstances where because of the tiny stubsize fsecure and gdata tagged the crypter as Kazy, easily if you used a 10-15kb icon on your crypted file everything was FUD. But that defeats the purpose of a small crypter right? Just pwned kazy detections now it's 1/34 after crypt without large icon, I'll have this FUD soon and get all you guys activated etc.

Palidino - July 22, 2011, 12:24 pm

is plimus instant activation?

????? - July 22, 2011, 12:49 pm

(Jul 22, 2011 12:24 PM)Palidino Wrote: [\[CITE\]](#) is plimus instant activation?

No but I'll be online most the day today after fixing the stub size getting tagged. Detections weren't caused from spreading, this crypter should remain FUD for atleast 2 weeks once I fix the issues. The problem was when I tested I crypted files below 30kb and files above 130kb and they were all FUD. That 100kb in between is the size that's getting tagged in the stub.

daemon10 - July 22, 2011, 1:55 pm

I have purchased this.. 3 days ago and i am not able to use it. Mind changing wtfud crypter status to offline.

So far havent even got one crypt out of it.

????? - July 22, 2011, 2:25 pm

FUD now after crypt for all files, uploading the stuff then activating accounts.

Pat. - July 22, 2011, 4:41 pm

This looks sick thanks i just purchased can you pm me?

yazzy - July 22, 2011, 4:45 pm

does this have startup or i can use RAT's startup ?
anyone can confirm ?

????? - July 22, 2011, 5:12 pm

You can use the RAT's startup.

Patrasta we're doing some tests then will pm you.

They're all activated, did you register your account on the activation page? PM me which email you used.

daemon10 - July 23, 2011, 12:44 am

Yes i did and i recived some code that you enter in 4 boxes and i have sent you pm as well.

jonathan3698 - July 23, 2011, 12:47 am

I am going to buy this soon.

truroxx - July 23, 2011, 1:44 am

what about startups ? useing rat startups or what and can use all rat settings your messege box is full and i cant pm you :P

Kyniem - July 23, 2011, 1:45 am

@????? : Your Inbox quota is full!

ishigo - July 23, 2011, 2:10 am

Okey i got my account activated ... support was very friendly and helpfull.. thanks for this nice product.

????? - July 23, 2011, 2:24 am

cleared inbox i'm on msn now

Cmd Prompt - July 23, 2011, 2:25 am

talking to aadster through pm right now

[R]eaper - July 23, 2011, 2:51 am

This crypter is freaking awesome, It takes someone with real skill/dedication to make a asm crypter. I will release a full review in the next day or two.

????? - July 23, 2011, 3:10 am

Activated everyone who contacted me over msn.

If you're not activated contact me and I'll teamview and get you setup.

Kyniem - July 23, 2011, 4:02 am

? Great Quality Product with grreat noob-friendly support; TESTED and Working with Blackshades Rat and Blackshades Stealer ?

xor - July 23, 2011, 5:49 am

Hey cknen, i want to ask, is this crypter able to bypass most of runtime detections? (Kaspersky, AVG, Microsoft Security Essentials,Norton Sonar), and Data execution prevention?

[R]eaper - July 23, 2011, 5:53 am

(Jul 23, 2011 05:49 AM)-=Conqueror=- Wrote: [\[CITE\]](#) Hey cknen, i want to ask, is this crypter able to bypass most of runtime detections? (Kaspersky, AVG, Microsoft Security Essentials,Norton Sonar), and Data execution prevention?

Don't lead into a sales trash, I have the other crypter you are inferring as well. Just be responsible about your competition. This is a new crypter and will develop over time.

xor - July 23, 2011, 5:55 am

(Jul 23, 2011 05:53 AM)001ramon Wrote: [\[CITE\]](#) Don't lead into a sales trash, I have the other crypter you are inferring as well. Just be responsible about your competition. This is a new crypter and will develop over time.

Man i am not trashing sales , i want just ask because i was looking to buy it if it can bypass them.. if u saw i also vouched for aadster ?

[R]eaper - July 23, 2011, 5:59 am

(Jul 23, 2011 05:55 AM)-=Conqueror=- Wrote: [\[CITE\]](#) Man i am not trashing sales , i want just ask because i was looking to buy it if it can bypass them.. if u saw i also vouched for aadster ?

Honestly man, I know what you are trying to do, don't keep asking "dumb ass/smart ass" questions knowing what the answer would be. You stated the option's earlier in that specific order knowing what it would lead too.

Kill?Muvz - July 23, 2011, 6:01 am

Lmao he was asking a legit question for fuck sake.

[R]eaper - July 23, 2011, 6:04 am

It will never be runtime fud because your crypted file will write registry entries to the disk which are detected from kaspersky

So this crypter will never be Runtime FUD unless they add a startup option.

truroxx - July 23, 2011, 11:13 am

idonotcare - July 23, 2011, 11:24 am

How can it be runtime fud? You are using your rats startup don't you?

So the rat bytes will get encrypted and decrypted at runtime and loaded in memory, then the rat will try to add itself to startup and it will try to write the registry key/s to the disk

And that writing is detected.

Unless the crypter has a startup function and you untick startup in the rat the crypter can't be runtime FUD.

Its the same as OnlineCrypter, that isn't runtime fud either because it simply doesnt has any startup function.

MiserAble - July 23, 2011, 12:40 pm

Glype - July 23, 2011, 1:43 pm

I will buy if they make this runtime fud

Hazurd - July 23, 2011, 1:52 pm

Lol Marcel says that "wtf ur detected" crypter is bad. XD

????? - July 23, 2011, 2:33 pm

Obviously you guys don't know what runtime FUD is.

The lack of intelligence on this forum stuns me.

idonotcare - July 23, 2011, 2:35 pm

Lol, nice that you avoid my evidence that it isn't and can't be runtime fud
How can it be runtime fud if its using the rats startup?

Please just tell us this :

Will Kaspersky detect a crypted blackshades server when its run? Yes/No?

????? - July 23, 2011, 2:48 pm

Honestly I wouldn't expect such stupid response from you, MarcelCoder.

Scantime Crypter = AV can scan clean but it will basically be a scantime binder which has a virus detected at 100% eventhough stub is FUD after binding other viruses. If there is an anti virus on machine which detects the virus inside the binder, then it will still get picked up.

Runtime = no file is dropped to HD, like injection, which is what my crypter uses.

Scantime FUD is near the same thing as Runtime FUD except runtime has an injection routine to avoid .exe to HD.

I have no idea where you guys got writing anything to registry means runtime FUD.

idonotcare - July 23, 2011, 3:11 pm

And that is exactly what i said mr.watson?

Your crypter loads the bytes in memory like a runtime crypter but once its load in memory the blackshades server will try to write registry keys to the disk because the user didn't unticked the startup function in Blackshades

So Kaspersky will pick that up because the way Blackshades writes the Registry key is detected (And all other rat's startup methods are also detected)

And the people can't uncheck startup because you don't offer startup in your stub, so they have to use the detected startup from the rat if they don't want their slaves not to come back after a reboot.

ok mr pretend russian. ?

????? - July 23, 2011, 3:21 pm

Scantime drops a detected file to the hard drive after execution. Runtime FUD means the crypter file isn't dropped to the hard drive therefore antivirus can't pick up its signature hence runtime FUD.

Registry modifications which are picked up by antivirus have nothing to do with runtime FUD instead those are behavioral characteristics of the malware which trigger antivirus.

This crypter IS runtime FUD.

idonotcare - July 23, 2011, 3:29 pm

For me "runtime" means during the time the file is "run"

Even if it is not "runtime" (Your definition of it) detected your crypter is still detected from Kaspersky while its run because of the rats startup.

Now please just say "Yes, the crypted file will be detected by kaspersky when the user uses the rats startup once the file is run in memory" and I'll leave this thread.

j4m3s b0nd - July 23, 2011, 3:36 pm

no it detects ti kis avaira nortan i just checked crypted server bro

????? - July 23, 2011, 11:27 pm

This isn't runtime FUD? Here's a video of it showing this is runtime FUD

<http://www.youtube.com/watch?v=mh0BeiE1JJY>

Obviously you need a better choice of software you're going to use. If your RAT does anything stupid that a proactive will pick up that is the RAT's fault and not the crypter. You achieve runtime FUD by loading the file in memory, this is what the crypter does.

Anyways due to you guys knowing NOTHING about runtime FUD, I added startup on the Crypter, you'll be able to choose whether you want to use crypters startup and specify the key name. The updated crypter will be uploaded in morning after I add it to php.

Fuck out of my thread kid.

You obviously don't know what runtime FUD is, scantime means that once the file is executed it is dropped and antivirus pick it up. Runtime means the file is never dropped therefore the antivirus can't detect it.

Behavior patterns is based on the malwares coding and not the crypter dumbfuck.

Not get out of my thread and go try to complete your '14 day shitty .net crypter' Btw I think you're just mad I didn't let you sell my crypter :)

Hazurd - July 24, 2011, 7:27 am

Ok you guys are missing the point. Who cares if it's scan time or run time? The point is: If you crypt your server with this crypter, the slaves antivirus will detect it once it tries to write the startup to the disk, and delete it.

Other crypters with startup will avoid that.

truroxx - July 24, 2011, 7:36 am

(Jul 24, 2011 07:27 AM)Hazardousgfx Wrote: [\[CITE\]](#) Ok you guys are missing the point. Who cares if

First of all let's make some facts clear so every customer and probably you understand the quality of this product here.

Scantime crypters are long gone. What I refer as scantime crypters are also known as droppers. These crypters drop the files by decrypting it and execute the payload. These crypters highly detected since antivirus hooks most of the APIs such as CloseHandle and CreateFile.

Runtime crypters on the other hand uses decryption on memory without dropping the files. So they decrypt the malware in memory and execute it from memory, thus evading antiviruses.

First of all WTFUD is a Runtime crypter and has the smallest stub in the world which will remain FUD for a very long time.

Crypters are coded to make your malware FUD upon execution. Some antivirus companies created tools such as HIPS, (Kaspersky's proactive thing) to detect the behavior of the programs. If some crypter seller says the product is runtime fud, then he is referring that your malware will not get detected upon execution SINCE it is not dropped like scantime crypters.

If someone comes and says - This is not runtime fud cause it does not have a startup module - Here is the answer:

No one needs to add a startup feature to crypter stubs because crypters are not remedies to people's old fashioned RATs which uses methods detected by proactive systems.

You can show me any FUD crypter and I can give you a sample which is detected by a proctive system because there are many other APIs which triggers detection just like startup features.

We bring you the best crypter here and this request is not a big deal for us.

We will be adding "WTFUD's secret startup module" as a checkbox which you can use to make old fashioned RATs undetected by proactive systems.

We will also name it as "Marcel's whining feature" in site so every customer will know why we added that and Marcel can just stFUD now.

We do not get any requests to add a startup feature from our customers but we will add that feature to stop people who try to find weaknesses in a quality product like this (eg. Marcel but there will be more since no seller likes an asm crypter to ruin all crypter business).

Also, we will add any feature that our customer's need in the future. We will make polls and stuff to give you what you deserve.

Thanks to all who appreciates asm coders.

Wizzay - July 24, 2011, 1:15 pm

I appreciate the post above, and just to let you know, marcel's whining did you good because I wondered about the startup to after marcel mentioned it, and now you said you will add it, i have no more doubts!

Matty - July 24, 2011, 1:26 pm

Wasn't going to buy this because it didn't have a start-up feature lol, but I guess now I have to since you just added one.

Glype - July 24, 2011, 5:08 pm

Im so happy the Marcel's whining feature has been added, i will buy this tomorrow :D

ASM - July 24, 2011, 5:13 pm

Kaspersky KIS, NOD32 Proactive bypass? And most of all, Sonar bypass? If it hasn't then are you going to add it?

yenkr - July 24, 2011, 6:32 pm

"First of all WTFUD is a Runtime crypter and has the smallest stub in the world which will remain FUD for a very long time."

lol

????? - July 24, 2011, 6:39 pm

I'm pleased to announce that [IridiumCoding](#) will soon be joining me on the development of this project.

Onsite live support coming soon.

Dex - July 24, 2011, 6:56 pm

? I love marcel as well as the coder!!! MARCEL made somehitng here...even i dont know him..but im the guy who said cybergate server catches to KIS NORTAN SONAR and AVAIRA (i have installed them personally in my office) then marcel started to talk at that and great coder he added something ? what a great guys!!! anyway waiting for activating ? hope to get it soon

????? - July 24, 2011, 10:51 pm

I already activated you as stated several times. Follow the directions in the thread to setup your account. Also, if you support MarcelCoder I'll go ahead and refund your money and terminate your license.

Regards,

truroxx - July 24, 2011, 10:55 pm

LOL i didnt support to marcel i just wanted to said you added something coz of him ...yea you activated when i log in (after enter the token it generates to home page) can you fix it or tell me

? agreed with you that part i have heard hes professional from my trusted friend i mean coder i got the crypter and without RAT startups it works (detects to KIS PURE but works) and with rat startup it get caught as a TROJAN

realaaaaa - July 25, 2011, 8:05 am

anyone got the msn support? i waited 24 hours , no live support is showing. i need to buy lifetime package, need activate instantly.

Regards,

You want to terminate his license for thanking me that i made him and some other hf members enjoying your product more? You aren't the smartest one are you?

Go and hate me, go and insult me, go and give your features my name and try to make me look stupid, but we both know that i won.

I'm MarcelCoder

I support the good and the right
I fight against the evil and the wrong
Expect my post.

truroxx - July 25, 2011, 9:00 am

Crypter detects AVAIRA , NORTAN, MACAFEE , and KASPERSKY runtime ...i have installed all av's in my VMs since i have a one target i had to installed them to check runtime...i tried blackshades , darkcomet and cybergate ..kaspersky detects even scan time now and no support!! please make it REAL RUN TIME FUD please im praying i trust the coder and i have chatted personally hes legit and he said its runtime but its not ..he says even i can use the binder of rat (such rat like cybergate) not binder even server also get caught!!! i can make a video with all av's single by single if you cant trust me ..your youtube video its just personal free avaira it wont catch since theres no behavior scanner (Sorry for my bad english)

VIRUZ™ - July 25, 2011, 9:13 am

I like this part + Small Size (average 5 kb, 3-10kb) :D

????? - July 25, 2011, 10:46 am

I replied to you just now.

Regards,

Justified - July 25, 2011, 2:47 pm

This looks nice good luck with sales.

OxideCSGOD - July 25, 2011, 3:03 pm

aadster reply to me on msn bitch :S

BalB0y - July 25, 2011, 5:17 pm

I bought it, now test it 2 times crypted same file one time 3/34 bitdefender, nod32 and kaspersky , then I tried to crypt same file secon time now I get 4/34 now nod32 kaspersky, gdata and vba

How to get it fud ?

iDarky - July 25, 2011, 9:03 pm

Damla crypter ^_^

(:) (/)

truorxx - July 25, 2011, 10:02 pm

I want refund bro i dont want this please this detects and no run time and i dont wanna wait for runtime program..

BalB0y - July 26, 2011, 4:05 am

Today is 9/34 wtf ?

http://scan4you.net/result.php?id=013f9_g4eg0

Kyniem - July 26, 2011, 5:44 am

i dont want to spend my \$25 for a cryper that detects (9/34) 3 days after buying :S
In Short, I want a refund!

vmartin - July 26, 2011, 5:54 am

This isn't looking too good...

I went down this path once before with Damla Protector.

Unless something changes, I'm not gonna risk \$80USD again.

VIRUZ™ - July 26, 2011, 5:56 am

World Tiniest Fully Detected Bullshit

By the way, even my vb.net 9kb stub is less detected LOLZ (3/34)

http://scan4you.net/result.php?id=0e0f0_ehcq3 Cryptex is 6kb scantime + runtime FUD ?

idonotcare - July 26, 2011, 6:14 am

6kb isnt possible unless you tweak the compiled exe or use some kind of downloader.

because 6kb is already reached when you even compile a simple messagebox

And the smallest runPE i found was 1kb

So my stub has 6kb from default, 1kb because of the runPE and 2kb because of other code of mine.

Oh, and my detections where only caused because of the storange method, with a different storange method mine is fud too.

truroxx - July 26, 2011, 6:22 am

please answer me please please im looseing my month days ...pleaes re fud this runtime or just gimme money

truroxx - July 26, 2011, 6:35 am

dnno hes a scammer or nor if he terminate me or doesnt do anything with runtime yea hes fucking scammer lets see

Arsi - July 26, 2011, 6:36 am

Thanks Marcel and truroxx For This info was Thinking About To Buy This..man I just Checked This Crypter thread started from 07-20-2011 and in only 6 Days to much problems... I Think Coder Should Refund The Clients Who Want There Money back and try To Code and make it FUD If he Wants To Run it....

_char - July 26, 2011, 6:36 am

(Jul 26, 2011 06:33 AM)MarcelTheCoder Wrote: [\[CITE\]](#) This is one of the biggest scams after Erebus and Damla :D

Damn just got a crypt from a friend. Its detected and i just bouought it fuck. FUCK. ???

realaaaaa - July 26, 2011, 9:12 am

paid and still not activated, to those who is detected, you are much luckier than me .

No reply on pm , no activate, no reply on msn/icq

disappeared for 24 hours.

paid 80\$

any luck?

daemon10 - July 26, 2011, 9:32 am

yeah its pretty detected like 8 av's

doom71 - July 26, 2011, 9:35 am

Hi,

Is it FUD at moment, I would be intrested

idonotcare - July 26, 2011, 9:44 am

(Jul 26, 2011 09:35 AM)doom71 Wrote: [\[CITE\]](#) Hi,

Dude read the fucking thread man, 10 people said it isn't fud and 10 other people said it isn't even runtime fud if it supposed to be FUD and 10 other people said that they want there money back and you seriously consider buying?

Buy it and you are an idiot.

yazzy - July 26, 2011, 10:17 am

It's just weird how things turn to be on this forum !

truorxx - July 26, 2011, 9:16 pm

hmmm...still nobodys reply even supporters if they are really busy and cant supply proper service why you guys selling this such a price like this !!! this is crazy re fud or money back

[R]eaper - July 27, 2011, 5:39 am

Apparently the coder said he will be back within 2 days time, he said that he has a graduate paper which is 96 pages long which he is behind on. I know aadster I definitely know he gives a decent lifetime to any product. Please be patient as he has a life too.

Eleg?y? - July 27, 2011, 5:46 am

If you just wait and stop being impatient it will be fine. Also, 9/34 ain't even bad calm down. Most of the dets are on ghetto AVs.

truorxx - July 27, 2011, 9:20 am
