Before I begin, I would like to mention that this how to is brought to you by [Customize Forums](#) - Where Imagination Becomes Reality.

Step #1 - Why do we need steps?

Go to <http://www.fliptext.org> and type in your desired text and click "Flip". You now have flipped text. YAY.

Ctrl Alt Down flips your screen upside down on some windows computers. It can help with reading posts such as above.

Emily - July 20, 2011, 3:24 pm

Well, I'm using an iPhone at the moment, so it's easy to read upside down text!

Xploit - July 20, 2011, 4:01 pm

are you kidding me. why does this tutorial exist?
