I read on another forum, this is due to low friends in your facebook profile. You got to have more than 5 was written. Don't know if this is true.

Complans - *October 22, 2011, 1:48 pm*

What are the requirements? I think the FB account needs to have been registered in a certain country or have a certain amount of friends, or something like that. Because sometimes when I get the code it doesn't let me have it.

Any ideas?
