Thread: [RinLogger Instructions](#)

...xXx... - July 21, 2011, 9:37 am

Hello HF I am a noob to the forums but I noticed that when I used the RinLogger I also had a little trouble with it but have now discovered how to use it and this is noob friendly. All credit to the program goes to Zero?? as he is a very smart program designer.

<http://www.nullbits.eu.pn/RinLogger.php>

That's the link to his program and he updates it there.

INSTRUCTIONS:

- 1) Download the program
- 2) Find where you downloaded it
- 3) Open it and click create new. The cure one is incase you used the logger on your own system
- 4) Here's what I recommend for the first page as it is easy
[img]http://img225.imageshack.us/img225/5255/page1mi.png[/img]
- 5) Next after page one click next
- 6) I also like to record logs for 10 minutes but that's your choice

[img]http://desmond.imageshack.us/Himg854/scaled.php?server=854&filename=page2l.png&res=medium[/img]

7) It records the logs when the victim's computers on and could get a bit cluttered unless you know who uses it whether they use it a lot or not

- 8) Page 3 Click enable and read the rest of that picture

[img]http://desmond.imageshack.us/Himg810/scaled.php?server=810&filename=page3aq.png&res=medium[/img]

- 9) On the 4th page I don't use it but I also don't know how so use it if you know how

[img]http://desmond.imageshack.us/Himg819/scaled.php?server=819&filename=page4wp.png&res=medium[/img]

- 10) 5th Page

[img]http://desmond.imageshack.us/Himg692/scaled.php?server=692&filename=page5p.png&res=medium[/img]

- 11) 6th Page

[img]http://desmond.imageshack.us/Himg849/scaled.php?server=849&filename=page6p.png&res=medium[/img]

Make them when they open the logger to see a certain website

- 12) 7th page

[img]http://desmond.imageshack.us/Himg232/scaled.php?server=232&filename=page7i.png&res=medium[/img]

- 13) 8th Page IMPORTANT

- Must click the ... button for the keylogger to save to make a name for it

- pick an icon from a site like.... <http://www.iconarchive.com/>

-Download an icon and use it inside Rinlogger by selecting it

[img]http://desmond.imageshack.us/Himg269/scaled.php?server=269&filename=page8c.png&res=

medium[/img]
Click COMPILE
Done!!!

Success you only now need to set it up for download or implant it personally and open it to start logging to you email

Why thanks for the compliment. I plan to become a Software Engineer when I grow up.

tomtom1996 - July 22, 2011, 6:05 am

works perfektly also for beginners :D nice TUT

Dread Pirate Roberts - July 24, 2011, 3:58 pm

Thanks for the guide, this program is great.

Legacy166 - July 24, 2011, 5:56 pm

Hey, I've done everything you've showed but nothings it keeps failing to send email? I've tried with smtp.live.com aswell. In other keyloggers my gmail works fine. I've also tried using different Gmail accounts :S

I've done exactly as below. I've filled in the information and then added my own Gmail to the Keylogger Recipients text box then pressed add and then when I go press next and click test connection it shows a dialogue window saying 'Failed to send email'

You didn't actually put "random@gmail.com" in the first e-mail box, did you? Those details have to be legit, as it has to have an e-mail server to send it from as well as to. The paranoid people on here will make a dedicated address with a unique password just for this purpose so that even if it gets 'jacked, there's nothing to lose.

@OP: This is a nice guide and all, but I really wish you would elaborate on all the steps and advanced options, especially the not-so-self-explanatory ones like on page 4. Not EVERYONE here is going to require the same setup as you. That's why the setup exists in the first place.

zero buddy add me to your yahoo my id is ustad_g@rocketmail.com want to learn from you

harry112 - *July 28, 2011, 2:15 pm*

Help me i dont recieve logs for some reason i did eveything the same...

I LVE MAGE - *July 29, 2011, 7:02 am*

if the person that downloads my rin logger has runescape up will i get there passwords

Ya Habibi - *August 8, 2011, 12:51 am*

nice

will try this sometime
