Thread: [Teamviewer Hack](#)

ImDeadly - July 21, 2011, 6:35 pm

hey guys i have heard that you can send some sort of rat through teamviewer and doing so it freezes their screen white and makes them lose control over thier mouse and keypad is it possible to do this?

-moon. - July 21, 2011, 6:37 pm

I dunno, never tried. Probably if they accept a file share and run it :O
Use social engineering and tell them to run it etc

or just rape their mouse and run it as fast as you can

One Piece - July 21, 2011, 6:38 pm

Lol ya it's not a hack either

ImDeadly - July 21, 2011, 6:42 pm

so its possible? can someone tell me how?

Thatkidwho - July 21, 2011, 6:44 pm

tes its possible u press tools i think not sure one of them on top then press disable innput and show black screen it frewezes screen black and the desiable makes them ot be able to type nor click

-moon. - July 21, 2011, 6:47 pm

Yeah and then if you remote control you can send the file and run it urself, close tv..

I suggest not doing this on people from HF that you are helping though...

Jittery - July 21, 2011, 6:57 pm

I'm pretty sure this is possible.

ImDeadly - July 21, 2011, 6:58 pm

its not ment for that it just happened to one of my friends lost all his rsgp -.-

eXtinct - July 21, 2011, 7:16 pm

@ OP none of these people know shit above, besides maybe scottie, if you're trying to rat people DL cybergate.

ImDeadly - July 21, 2011, 8:00 pm

i figured it out ty guys for the help :)

u were right there is a button on top that makes black screen and freezes keys

Will and Integrity - July 21, 2011, 8:01 pm

It's possible, but it wouldn't be a "silent method".

Nawk - July 21, 2011, 8:02 pm

Use their direct link in a conversation fast or by doing so by manipulation and ye, easy mode.

Greystersting - July 21, 2011, 8:13 pm

I'm pretty sure there is a send file and launch option in TeamViewer. Just use that with your RAT and if it's found by antivirus just click ignore and exit out.

ImDeadly - July 23, 2011, 11:10 pm

theres actually a option to stop someones control over the computer

YoungTriggerBot - July 24, 2011, 12:31 am

I don't know about sending a rat over but i know you can disable there utilities. :D

?Ñåzg?! - July 24, 2011, 1:00 am

I install teamviewer on my slaves computer Unatenttd acces
and yes you can make the screen black and get rid of mouse input
not a hack its NORMAL

To do this you must use unattended access go to advanced settings and disable teamviewer shutdown

right at the bottom there should be admin password make it your own personal password

Martee100 - July 24, 2011, 1:24 am

I think its possible if the File transfer is enabled.

ImDeadly - July 28, 2011, 10:55 pm

yeah i think it is if file transfer enabled idk tho
