This is my first tutorial in Hackforums and you may also called Yahoo Spreading Method. In this tutorial we will infect people in chat rooms where you will get millions of people. Hope you will like this tutorial.

What will you need to do?

1. Signup To Yahoo
2. Download Yahoo Messenger (US Version)
3. Make Your FUD Server
4. Exploit Exe File
5. How To Spread
6. Little Brain

Let's Start

Signup To Yahoo

First of all go <http://mail.yahoo.com/> and Create new account as shown below.

Spoiler ([Click to View](#))[img]http://i1104.photobucket.com/albums/h338/fmuhammad51/Y1.jpg[/img]

Just fill out the form to signup and make sure the email appears as a girl. So chose something different i.e spicylips, missdenise1991 misspamela or something like that. This is why because the hundreds of boys / men will attract you and may trap easily. See the picture below.

Spoiler ([Click to View](#))[img]http://i1104.photobucket.com/albums/h338/fmuhammad51/Y2.jpg[/img]

This is done now just press Create My Account

Download Yahoo Messenger

Go <http://messenger.yahoo.com> and download yahoo messenger as shown in below.

Spoiler [\(Click to View\)](#)

Make sure to download US version because if you download other versions then you don't get the chat room feature installed.

Make Your FUD Server

First of all create server of your RAT / Keylogger and then make your server FUD because of to avoid AV's detections. I will suggest you to use private version of crypter. Anyways you can also use free version of crypter.

Here is the link of free version of crypters.

Spoiler [\(Click to View\)](#)<https://hackforums.net/forumdisplay.php?fid=126>

Exploit Exe File

I will show you how to exploit an exe file manually and with the application / software. Make sure your output must be .scr format and rename the file as IMG0512. Because its looks like original.

Here is link of Manually exploit an exe file.

Special Thanks To Cuddle

Spoiler [\(Click to View\)](#)<https://hackforums.net/showthread.php?tid=1020443>

Here is link of exploit an exe file with the software.

Special Thanks To KillMuz

Spoiler [\(Click to View\)](#)<https://hackforums.net/showthread.php?tid=1429385>

After you should change your server icon. It should be looks like this.

Spoiler [\(Click to View\)](#)

How To Spread

Now it is the time of Spreading your RAT / Keylogger server.

Open your Yahoo Messenger and login in. After when you login on then Go Mesenger > Yahoo! Chat > Join Room as show in below.

Spoiler [\(Click to View\)](#)

Then go to Adults Room because you will get thousands of men there. See below.

Spoiler [\(Click to View\)](#)

When you enter the room then Yahoo will ask enter the CAPCHA. Then should write the CAPCHA to get access the room. See Below

Spoiler [\(Click to View\)](#)

When you entered the room there are thousands of people who invites you to chat with me in few seconds. See the picture below.

Spoiler [\(Click to View\)](#)

After this when they inviting to chat with you. then you may chat with them like this

Target: hi wana chat

You: Sure

Target: asl please

You: 21 F USA and you?

Target: 26 M UK..

You: Honey, You wana see my pics, its naked.. ?

Target: Sure Why Not!!

Then Copy your server and paste it. Then the target should accept your naked pic. See below!!

Spoiler [\(Click to View\)](#)

Now your target is become slave.

Thanks For READING?

So Guyz, This tutorial takes me 4 hours to write. I am new here and this my FIRST TUTORIAL in HACKFORUMS as I sad above in the beginning of the tutorial. So encourage me to write more tutorial as this is PART 1 (ONE).

I need help. Ok when I change the name from .exe to .scr it tells me that it will be unusable or something like that. I don't wanna try it. Cause I don't wanna get keylogger by myself lol. So can I still name the .exe file to .scr. without corrupting the .exe file? Thanks

I figured it out but yeah is there a really good key logger out there, I would even pay for it but I kinda don't know which one to get. I was using Ardmax but this shit suuuucked, since this yahoo method is awesome I could really get a lot of slaves :D

First of all don't tell me man ???

You should use private keylogger by searching in Marketplace but if you want free version then you should use Rapzo.

I suggest you to use BlackshadeS RAT. This is a paid version and very stable but if you want to use public then you should use DarkComent v3.2 FWB!!!

Golliath808 - August 1, 2011, 3:17 pm

Definitely a GREAT NEW METHOD ,I loved the "some guys will want to chat with you " part and then tons of pics appears ROFL!

But the single problem is that some guys are still using Win XP, so XP don't support unicode and the extension spoof fails in that case :(

ANOTHER METHODS THINKED BY ME TO S.E. THE EXTESION ;) :

-get used by the Winrar SFX to open both the pics and your server, while when he receive your 'package' he will see it a winrar icon and its a arhive and will open it x]

- or simply rename your 'file' as "sexyalexa.blogspot.com" (note exe files changed at .com files still work !)

-or if use the EXTENSION SPOOF METHOD : try to get your 'file' as pamelaissexe.jpg ;) Got it ? :)))

Anyway,good luck ;_)

I think this depends on internet speed of the user who chats with you (His / her internet speed slow or use dial up). So I never seen this problem to anyone who applied this method of spreading. Try a little bit more harder. ??

There is a problem with this method though. When using RAT crew spoofer. the exe remains the same. that is to say. Yahoo messenger as fixed it. When sending the spoofed server file it sends as "Name" (bytes) "exe" ".jpg"

But other then that, very nice share!
