Thread: [Bots, Bots, and Bots.](#)

magstrike105 - July 23, 2011, 9:50 pm

I'm new to the more advanced hacking so I was wondering where I can get some bots. I know how to get a cod4 bot or something, but i'm pretty sure you can't use those to DDos. I would buy them if I need to, but the source needs to be reliable and cheap. I prefer not to though cause it feels kind of like cheating. Thanks in advance for whoever can help. I'm gonna jizz my pants if I can actually DDos someone.

wait wait wait...

a) Are you looking for a aim bot?

b) Are you looking to DDoS someone off x-box live?

Eruditus - July 23, 2011, 9:59 pm

Why don't you just buy access to a booter?

What are you looking to hit offline anyway?
