Thread: [\[TuT\] Creating Custom Firmware \(Windows\)\[TuT\]](#)

Døñ - July 25, 2011, 9:45 pm

What is Custom Firmware?

Code Lets you make a "custom" Firmware that adds non-apple materials to your IPSW or unlocks it for other carriers

Why do I need it?

Code Well, it helps you save a lot of time if your restore and need to re-store and re-jailbreak

Cool!, How do I get it?

Code Follow my steps!

--

[DOWNLOAD YOUR IPSW HERE!](#)

1. Go to [Snowbreeze's site](#) and download sn0wbreeze 2.7.3

[img]http://img197.imageshack.us/img197/5254/snowbreezesite.jpg[/img]

?[sn0wbreeze 2.6.1 \[For 4.2.7/4.3.2\]](#)

?[sn0wbreeze 2.5.1 \[For 4.3.1\]](#)

?[sn0wbreeze 2.2.1 \[For 4.2.1\]](#)

?[sn0wbreeze 2.1 \[For 3.2.2/4.1\]](#)

?[sn0wbreeze 2.0.2 \[For 3.1.x to 4.0\]](#)

2. When you download it you get a ZIP file, and Open it

[img]http://img837.imageshack.us/img837/3624/snowbreezeprogram.jpg[/img]

3. Extract the Snowbreeze Program

[img]http://img28.imageshack.us/img28/9849/snowbreezefileopen.jpg[/img]

4. Launch the Program and look for the IPSW you downloaded

[img]http://img855.imageshack.us/img855/6553/programx.jpg[/img]

-EACH VERSION OF SNOWBREEZE WILL HAVE A DIFFERENT UI!

5. Either Drag or Click Browse to look for the supported IPSW version (in this case 4.2.8/4.3.3)

[img]http://img33.imageshack.us/img33/1899/lookfor.jpg[/img]

6. It will Identify the IPSW

[img]<http://img231.imageshack.us/img231/6894/57664427.jpg>[/img]

7. It will tell you what device the IPSW is meant for

[img]<http://img691.imageshack.us/img691/3884/idok.jpg>[/img]

8. For here you can proceed and either select Simple Mode or Expert Mode (depending on what you want)

[img]<http://img828.imageshack.us/img828/4821/pickrv.jpg>[/img]

From here you should be smart enough to follow the steps (IF YOU ARE A NOOB AT MAKING IPSW'S PICK SIMPLE MODE)

After its all done creating the IPSW, there will be a custom IPSW on your desktop

Any Questions PM ME!

D3xus - July 26, 2011, 6:23 am

Very nice tut for the n00bies. If you have any questions feel free to PM me too :D

CaZzUaLLv3x - July 26, 2011, 9:45 am

lol i needed this in 2009 not 2 years later,
theres loads of tuts for these

Døñ - July 26, 2011, 10:10 am

Ya but People still don't know how to use google and still ask, I get a lot of messages asking how to do it

Tacnayn - July 26, 2011, 11:19 am

WTF, this just jailbreaks the IPSW which you then restore your Device w/ the jailbroken IPSW!!
hahaha, making your own IPSW will take more than this, it'll take ALOT of coding and TIME to make an IPSW!

Døñ - July 26, 2011, 11:39 am

I said it creates custom firmware for you, I didn't say you could make a IPSW
