Thread: [hacktools paid version \(SQL INJECTION \)](#)

Shellboothacker - July 26, 2011, 4:14 pm

Hello there,

I was wondering if there are any private versions of programs that helps yo hack homepages..
Im looking for something better than havij, and i'm also looking for something that helps to search if a site is vulnerable.. I mean something that looks through a site it self.. Anything like this exist?

I want to buy obviously.. So that i can hack sites easier..

thanks!

Note; I do not want any public tools.. if those things exist then maybe you can send me link to a topic where someone trusted sells it..

I would also like to get some PRO SQL inject hacker to teach me how to hack some sites, I would pay a lot of money for that too..

yea well i have the money to afford it. therfor i want to buy it if it's possible! :)

thanks for the tips tho, appreciate.. I'll look there for sure.
still in search of!

This thread is 3 years old.

I dont think someone will contact you. Lol
