If you decrypt the "easy" hashes you will be added to the "n00bs" list. If you crack the "hard" hashes you will be added to the l33t list. You must Crack All hashes in the "easy" section to get into the "n00bs" list of members. You must crack all hashes in the "Hard" section to get into the "l33t" list of members! Agreed at most it would be testing how good your processor is if your brute-forcing and if your preforming a dictionary attack its just proving how complex your wordlists are(same goes for rainbows)
