Libyano - October 1, 2011, 4:18 pm

Name: Libyano

Age: 17

I am not an advanced hacker, so please don't expect to see some dyed hair lonely dude who types with his eyes closed

I just use tools But i know what goes on,

Health: Internet addict ;)

About me: familiar with visual basic, flash adobe, HTML, batch & linux scripting and social engineering
learning C + php

Reason why i want to join is because i want to get better at hacking, and it only comes through team work ^^

lut4 - October 2, 2011, 6:05 am

Hey. I am lut4.

I have a lot of experience and knowledge. I am a great teacher and i have taught several before. I am only whitehat, because i have been arrested before.

My skills include:

- Reversing
- SE
- Vulnerability discovery/exploiting

- Linux command-line
- Windows command-line
- Server configuration(Linux/Windows)
- Rat Spreading(only tips and trick)
- Portforwarding
- General IT Support
- Finding and killing infections
- Information digging
- Code understanding(almost all languages)
- Some programming knowledge(VB.net/C++)
- Evading of law enforcement(VPN/Socks/Crypting/Obscuration/Proper Erasing etc.)
- Probably more

I deserve to join this group, because i have a lot of years in the business. I will also be a good mentor, because i have a lot to teach people and are extremely patient with beginners. You also need a whitehat to guide you, so you don't get caught. Beside that, i am very friendly and a good teammate.

I am the kind of person who is dedicated, and always willing to help out. I am a very social person. For those of you know Bourdieu's theory's i have a high cultural capital.

Paradox- - October 2, 2011, 9:10 am

i can hack, not like most of these skids on this site so im not going to make a try hard list.
im gurd.
