Welcome HF!

In my previous thread: <https://hackforums.net/showthread.php?tid=1532581>
I had alot of people asking for a Tut, so here it is!

The pack with all the tools: <http://www.multiupload.com/6JR19G5F9I>

The Tutorial!:

Step 1: Download WinRar and open the file downloaded above.

Step 2: Double Click the Rainmeter executable, and install it.

Step 3: Open Omnimo 4.0 and click on the highlighted file to open it.

Step 3. Use the following settings:

Step 4. Close out of these panels (Right Click, Close Panel)

Step 5: Drag the panels like so:

Step 6: Right click on on a panel and select these options.

Step 7: Arrange new panel here:

Step 8: Right click here and chose close panel.

Step 9: Finished!

Step 10: I also Included the tools to change start button and icons! Btw the wall paper is there too
Remember leave feedback here if you liked it! ?
Sorry for big images, don't know how to hide them.

To hide things in spoilers do the following:

PHP Code

```
<?php
```

```
