Thread: [Online crypter, Crypted my file with basic settings\[File after crypt: 9/34\]](#)

N.S.A. - August 1, 2011, 7:44 am

Hello, I use onlinecrypter.com and made no changes to the existing settings on the site. This site is more shitty then jb's music, Do not use this and dont pay for it, how can you call this shit fud?

Here is my scan:

<http://virscan.org/report/739893993f629d69de7c0c74db344f6e.html>

Lockdownnn - August 1, 2011, 8:07 am

Yeah the infection rate isn't great even if it is FUD.

N.S.A. - August 1, 2011, 9:49 am

Its soo crappy, better they shutdown the website.

Heisenberg Walter White - August 1, 2011, 9:51 am

Yes i reconized the same.

Never use a online crypter again :S

Liquicity - August 1, 2011, 9:51 am

You're better off buying a crypter here on HF. Considering OnlineCrypter gives you such crappy results.

American Apathy - August 1, 2011, 10:04 am

How is the online crypter on My-avscan? I was thinking about trying but it's not fud.

Lonely - August 1, 2011, 10:17 am

LoL i thought the SAME thing. everyone was like, "100% FUD FTW!!" so i tried it and was like umm? nope.. so I bought a crypter, three words "Best. Investment. Ever." (:

sniper-wolf - August 1, 2011, 10:44 am

MY FILE IS LIKE 5/34 STILL GOD ONLY DETECTION ARE LIKE F SECURITY BIT DEFENDER ETC BYPASS NOD32 KASPERSKY MOST PEO[PLE DONT USE DIFERENT AV WHAT U ASPAKE FOR ONLINECRYPTER ;)?

NotCookie - August 1, 2011, 3:17 pm

Oooops. I posted in the worng thread. Sorreh.

RvsK - August 1, 2011, 4:18 pm

Thank you, now i ain't going to use OnlineCrypter.

N.S.A. - August 1, 2011, 4:24 pm

(Aug 1, 2011 04:18 PM)black cat Wrote: [\[CITE\]](#) Thank you, now i ain't going to use OnlineCrypter. Your welcome. Shitty crypters are waste of money/time

Lil Uzi Vert? - August 1, 2011, 4:27 pm

I used OnlineCrypter once and it worked fine. On the site they even tell you to play around with the settings to get a unique encryption. Don't knock it if you only tried the the default settings.

N.S.A. - August 1, 2011, 4:28 pm

Are you stupid ? 9 of the 10 times if you change default settings you bot will be corrupted + you dont know what you talk about do you think I never tried this ?

Lil Uzi Vert? - August 1, 2011, 4:32 pm

Then check what settings you're using that corrupts it and don't use it? Did they not teach you the process of elimination in elementary school?

N.S.A. - August 1, 2011, 4:39 pm

Kid have fun with your first rep. Ur shitty you come here to talk bullshit.

Damdomy - August 1, 2011, 4:41 pm

You do know that they stopped developing it right?

Lil Uzi Vert? - August 1, 2011, 4:48 pm

I only offered my opinion on the service. You are the one who attacked me. You're real cool for saying I don't know what I'm doing when you're one who couldn't even figure out how to use OC correctly.

N.S.A. - August 1, 2011, 4:51 pm

I never asked you for your opinion, now gtfo from my thread.

Lil Uzi Vert? - August 1, 2011, 4:55 pm

Aww, you mad bro?

Anyways, here's a quote from Synurgy. One of the creators of the dreaded OC ?

"See, where you say that the crypter isn't fud means that you don't even know how to use the crypter completely.

We have proven and have demonstrated along with other customers that have, that you can always achieve fud results.

It may take a bit of time and knowledge, but you can definitely achieve fud at anytime and that is what our goal was from the start.

So, don't blame our crypter for your laziness or lack of knowledge.

Over 6.5K registered users, well over 5K orders, between 10 to 20 orders daily, and receiving between 2K to 6K unique visits per day.

As of right now, we are the most popular, most used and the most referred to crypter in the world."

Good day sir ?

Synurgy - August 1, 2011, 8:00 pm

Thanks for pointing that out. Most of these users come to OC, use default options and think miracles will happen.

They don't understand the concept of how the crypter is made and why it was made this way.

Those users are the ones you see here saying "Yea, it sucks, its not fud", while we have a few thousand other customers achieving fud daily and/or happy with their results.

(Aug 1, 2011 04:24 PM)Virus.exe Wrote: [\[CITE\]](#) Your welcome. Shitty crypters are waste of money/time

And shitty users with lack of knowledge are a waste of time, space and energy.

Maybe I'll look into getting a book made for dumbass's that don't know how to simply change an option by clicking their mouse button.

(Aug 1, 2011 04:41 PM)Damdomy Wrote: [\[CITE\]](#) You do know that they stopped developing it right? We did? Very weird. I manage OnlineCrypter and have never heard of this. lol

(Aug 1, 2011 04:51 PM)Virus.exe Wrote: [\[CITE\]](#) I never asked you for your opinion, now gtfo from my thread.

And no one asked for your opinion either. We're sorry that you had a bad experience with OnlineCrypter and we can fix many things, but stupid we can't fix. ?

Carb0n F1ber - August 2, 2011, 3:39 am

I've purchased the services of well over 20 crypters here in HF. Nothing has given me more satisfaction than OC has. Really, if you find it that hard to simply 'change' options, there is none other excuses for stupidity.

OP is complaining because default options doesn't give him FUD. I'll tell ya the same. Default options will NOT give you FUD. Imagine 1,000 users using default, what do you expect ? Magic ?

I've achieved FUD (or rather close to FUD) from even the God damn expired codebases. The ones that were leaked into public. I'm really busy IRL, else one of these days, I'm gonna put up a video of how even FUD can be achieved from codebases dated back to early February/March 2011.

In my opinion, OC has taken crypting to a whole new era. The ultimate fight against AV's, and OC is winning. I'm definitely sure AV companies are having a hard time comprehending and competing with detections.

For the remaining of you joining hands and complaining, I just have 1 thing to tell you. Quit OC and go buy a crypter that does "Select File -> Crypt = FUD". From there, you'll see how long your file lasts.

Moodiez - August 2, 2011, 3:48 am

Who wants a 9/34? lol

toofkingshoort

aspirin - August 2, 2011, 4:03 am

Very much agreed carbon. ?

stylo_asif - August 2, 2011, 7:26 am

Lols Very Good Vrius.exe You batter Too buy A FUD Crypter

IDontNeedAUsername - August 8, 2011, 6:18 am

That's also because people like you scan on scanning sites that do this:

"If the file you uploaded is detected as suspicious, VirSCAN will send the file and report off to the antivirus vendors participating in the VirSCAN service to be analysed. Antivirus companies will update the signature virus database if a real malware is found. "

DgK - August 8, 2011, 12:45 pm

ya bro i use to use it and it was shit 1 time they didnt update for a month i mean comeon???

Habs - August 8, 2011, 1:02 pm

Haha, OC works perfectly fine you have to tweak the settings and options. That is really the whole point of OC is that you can make you're very own unique encryption. When i first used OC it took a day to figure out the best settings but after a couple tries you get FUD and for a long time.

palmatum - August 8, 2011, 1:43 pm

it is a good solution ? i dont know

Carb0n F1ber - August 8, 2011, 1:52 pm

lol OP feels like an idiot right now ... ?

iAmUnDefined - August 8, 2011, 2:04 pm

That's why you invest in private HF crypters.

Golliath808 - September 1, 2011, 4:30 pm

Crypting your server with online crypters is like using the same condom again and again.... those crypters are so used(over 20 downloads per day)and any noob can upload them on VT. Better get

a not-overselled crypter!
