Thread: [how to sniff chatango ip's](#)

alwaysshacking - August 2, 2011, 6:36 am

Pretty new to hacking and need a way to sniff/find some ip's from a chatango chat, thanks.

FaceNuke - August 2, 2011, 6:49 am

Why would you even need to do that? It's not like you can do anything other than show them their IP to scare them or flood their router.

alwaysshacking - August 2, 2011, 6:50 am

wanting to boot people offline.. thought this was a hacking forum..

Scanta - August 2, 2011, 6:51 am

it is, define boot ppl offline

alwaysshacking - August 2, 2011, 6:52 am

oh just for like 4-5 minutes

Scanta - August 2, 2011, 6:57 am

no no, again, explain what you want to do exactly

alwaysshacking - August 2, 2011, 7:00 am

flood some ip's on a chatango chat

just need a way to get the ips

just need to find some ips on chatango and i dont know how and thats why i made a thread about it, asking for some help on how to find ip's on chatango dont worry about what i will do with them.

Scanta - August 2, 2011, 7:34 am

Not sure how much experence you have with hacking/networks, but you cant do much with just an IP..

alwaysshacking - August 2, 2011, 7:39 am

okay then direct me in the direction of a sniffer that can me chatango ip's i'll do the rest from there.

Scanta - August 2, 2011, 7:48 am

Try using the sites search bar or if that fails try using Google. Best of luck!

FaceNuke - August 2, 2011, 7:51 am

No offense but I would consider a change in username if I was you, alwaysshacking. You can find flooders in the forum, yes this is Hack Forums but no one is here to wipe your ass or do your dirty work, so I suggest before posting questions that you look through the forum and take the initiative to find out for yourself, then ask for help.

bradleystrider - January 31, 2020, 1:54 am

Yeah someone answer his question already. How do you sniff the ips. I can't believe I just read an entire page of people refusing to answer the question. You should all be ashamed of yourselves and shouldn't have even fucking replied at all.
