Thread: [BreakDown Challenges v2 - Test your hacking skills](#)

nigganigganigga - August 2, 2011, 3:12 pm

Since [my last thread](#) is bugged and it's not possible to reply anymore, I opened another one.

[BreakDown Challenges](#) is a non-profit website that allows you to test and improve your knowledges in various levels.

There's a scoreboard, user management system, Private Messages and more.

For register to website you just need a user name and a password.

URL: <http://m4rkz.altervista.org/breakdown/>

If you want to develop levels feel free to PM me.

Burn™ - August 2, 2011, 3:15 pm

Yes, it has got them, it's level 3.

I meant all of them not just that one I posted :)

Probably I missed just the first one that I made, they were really easy (Basic LFI and basic MySQL Injection). It would be useless releasing new levels that are basic.

The purpose of the website is learning in a harder level.

What additional string on < tags can bypass them? Think to that.

jalal77 - August 3, 2011, 3:47 am

go for enigmagroup.org & securityoverride.com great site for hacking challenges

nigganigganigga - August 4, 2011, 2:39 am

Today I'll probably add a new level.

PeskyPete - August 4, 2011, 3:47 am

I have literally tried everything on level 1, and the only thing that works is changing the URL to Level2 however this can't be the hack because it does it with every level >.>

Any tips?

I have tried the source code, I tried Md5 decoding the green text in the source, I tried using it on its own, I tried 1=1 and '1'='1 with no luck! I also tried SQLi, however as order by does not work I doubt its vulnerable.

You'll have to understand what's the encryption, check PHP doc.

thethatguy - August 5, 2011, 5:45 am

M4arkz I can't remember what I set my password to.

supracontra - August 5, 2011, 5:52 am

Cool little hackits site :)

Also, base64 is an encoding not an encryption ;)

-- edit --

We currently got 578 registered members!
Only 147 hackers solved one or more levels.

lol...

thethatguy - August 5, 2011, 6:47 am

Thanks got in pretty neat. Got level 1 will carry on with this tonight tight challenge mate. Off to MMA fighting tonight, hope I remember my name later.

cheers

I wonder when someone will actually take this serious.
So many registered users but almost no solvers.
lets wait for 21!

M4RKZ, you need an index page to redirect to /breakdown. If you try to go to "http://m4rkz.altervista.org/" you get an error.

Like most of the challenges, i think some need slightly, or even any explanation. I dont see the point of the 'Valid File Uploaded' message, if you've got it wrong the simulation should give an error msg as well.

Hope you take it on board :)

Too hard mate! Would like to see tutorials listed that help to solve each on so you can learn the skill then try it out as opposed to spending hours and hours on them without learning anything. I would also suggest making the challenges be more robust so that the only solution that works in the one that it was meant to test (thinking of how you can literally upload shell.Php on the image upload challenge but thats not the 'unique' solution).

What's the issue you got? Read the name of the level and read the source.

I mean, i don't understand what i'm supposed to do.

also on the xss challenge i used html character to encrypt the script tags. it never filtered it, but it didn't execute it O.o.

Can you PM me on there since you can't on HF? My user is "lolololol"

I'll try to explain briefly without spoiler.

In the source code there's an "hidden(?)" parameter that's not sanitized, you just have to exploit it and get the administrator password. It's not that hard, just POST injection and not GET injection.

Hey Tom, nice to see you :) Have fun

We currently got 903 registered members!
Only 246 hackers solved one or more levels.

This is really good, if you can get through here you are a hacker.

Cheers M4rkz awesome challenges, wish I had more time but utilizing the bit I have.

Well considering that hacking isn't just related to web but there are network,software,social etc - I probably shouldn't use the word "hacker" but too lazy to edit it.

Solving these challenges won't make anyone hacker however it's a good way to have fun and learn something new in web-hacking.

Have fun solving challenges.

Doxter - September 30, 2011, 9:10 pm

I wish there was a cheatsheet for the ones that I can't do. I completed about 50% of them but some of them I know I will never be able to do alone.

nigganigganigga - October 9, 2011, 3:45 am

Added level 23. Check it out now guys!

+Awesome - October 9, 2011, 4:12 am

Why not add comet chat to the site? Would be great.

solitarywarrior1 - October 9, 2011, 4:15 am

how can i start the first level? bro. i can't find it :)

m0ritz - October 9, 2011, 4:35 am

I'm going to try this out right now, I will post results later on! :D

Bender. - October 9, 2011, 7:56 am

Wow this seems cool !

i'm going to test right now ! ;-)

Cyclus - October 9, 2011, 8:39 am

oh my gawd, so awkward...

i cant even do level one

Look at the level 1 name, it says all.

BiosWarden - October 19, 2011, 7:17 pm

Any hints on level 2? ^_^ I have been stuck on it literally for days on and off. :D

Look carefully what happens in the source. There's a unfiltered parameter.

Which of them? Specify the level number.

CyberSyringe - October 22, 2011, 9:56 am

Back to the drawing board..

I haven't even solved level 1.

LOL

Level 7 and level 10, both of them.. Please help me with them.

Dyme - October 22, 2011, 10:07 am

Anybody want to teach me what I need to do in order to pass level one... I fell like such a retard.

BlueMelon - October 22, 2011, 10:13 am

Level 12 is not working.

It says "Uploaded" when I upload my php file, but it does not add my points :/

It means it's uploaded but not valid PHP file. Every level works :) (Oct 22, 2011 09:56 AM)Calculus Wrote: [\[CITE\]](#) Level 7 and level 10, both of them.. Please help me with them.

7: you have to find admin login panel, there's a file that is important to hide it.

10: read some docs about LFI filter evasion

Shibe - October 22, 2011, 1:04 pm

Lol, I am trying the XSS Filter bypass, but the character "<" isn't allowed. I shall not give up ?

callas83 - October 22, 2011, 1:15 pm

anyone can send me PM to help me in the 2nd level please?
