I'm not sure, but I think it's MD5.md5's have 32 characters, and use characters a-z,A-Z,and 0-9. If the character sequence meets each of these rules, it's md5.

n31ght0 - August 6, 2011, 4:56 pm

b0cc014fa17bf25e374e900be4ba06db:uGh

That is from vbulletin 4 forum.

if you want to crack that use this format md5(md5(\$pass).\$salt)
Hope you have a good wordlist for that.

Thanks in advance ?
