Did you use the themebase as well?

Yes I did, Theme Base 1.5.2. When I type this AdobeProgressBar1.Increment(1), I'm getting error 'Increment' is not a member of 'WindowsApplication1.AdobeProgressBar'.

I got it to work. I was looking for the solution 4 hours (I am a newbie in VB)

This is a list I ain't updated in a while since there was a theme base made by Tedd so if you would like to see other themes and still want to use this hit me a pm up with the themes you want to see.

Maybe you can put up a poll or categorize top rated themes, favorite themes or best themes... you know saves hell lotuva time for many users searching for some kickass themes !

I second that, thats a great idea. Make a list of polls the most ticked go at the top in a Badass theme list.
