Click the Form1 and Add this Code :-

[This will Load the 4Shared Server]

```
Code Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
```

Handles MyBase.Load

```
Me.Enabled = False
```

```
WebBrowser1.Navigate("http://www.4shared.com/")
```

```
End Sub
```

Click the Button1 and Add this Code :-

This is Enter Ur Premium account Details and Login You In....

```
Code Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
```

Handles Button1.Click

```
Try
```

```
MsgBox("Please Wait !!.. 1 Minutes For the First Use", MsgBoxStyle.Information, "4Shared Premium Downloader")
```

```
With WebBrowser1.Document
```

```
.GetElementById("login").InvokeMember("click")
```

```
.GetElementById("loginfield").SetAttribute("Value", "your Username")
```

```
.GetElementById("passfield").SetAttribute("Value", "your password")
```

```
End With
```

```
Dim allelements As HtmlElementCollection = WebBrowser1.Document.All
```

```
For Each webpageelement As HtmlElement In allelements
```

```
If webpageelement.GetAttribute("value") = "Login" Then
```

```
webpageelement.InvokeMember("click")
```

End If

Next

Catch

MsgBox("You Are Already Click This" & vbNewLine & " Please Enter the Url then Click Download", MsgBoxStyle.Information, "4Shared Premium downloader")

End Try

End Sub

After that Add this Code :-

If the Document Completed It Enable the Program

```
Code Private Sub WebBrowser1_DocumentCompleted(ByVal sender As System.Object, ByVal e As System.Windows.Forms.WebBrowserDocumentCompletedEventArgs) Handles WebBrowser1.DocumentCompleted
