Hey Hack Forums, i decided to release my 3rd or 4th Theme called Rockstar Theme. Why is it named that? Because i tried to base the colors off of the drink called "Rockstar Energy." Please, do NOT hate.

So here is an image:

The troll is just doing what it does best. Don't feed it, you only make it worse. Ignore his posts.

And great job on the theme.

There is so many themes being released in the VB section these days.

As for the theme, it really really hurts my eyes, i cant think of a reason why anyone would use those colors.

Maybe try to use more subtle colors instead?

No offense meant, just my 2 cents.

Regards

Lol you say "These days" but you signed up this month which means you have been around for 5 days at most.
