Thread: [\[Free\] FUD Crypting Service \(iStealer, Cybergate, Blackshades, Darkcomet, and more!\)](#)

I Go Nom - August 4, 2011, 7:47 pm

Hey guys, I wanted start this new free service in HF. I see most people paying from \$1-\$5 to have a FUD crypted file. I'm offering it to you for free. I know some of you may not trust me because I have low post counts but hey, everyone gotta start somewhere to be a part of HF community. If you don't trust me, you don't have to take this service.?

It is scantime/runtime.

[Free] FUD Crypting Service (iStealer, Cybergate, Blackshades, Darkcomet, and more!)

Rules:

- Do not use virustotal.com to scan your file. It will get detected soon! If I find that people are using that site to scan the file, I may shut down this service.
- PM me your infected file link. It must be in mediafire or a direct link. Do not post the infected link here because I don't think it's allowed.
- One PM from user per day only. If I get mutiple PMs about doing crypting your files, I won't do yours. I don't want my PM box to be spammed.
- Do not PM me back saying "thank you for crypting" or "thank you for this service". Post those comments and vouches in the thread. I expect one from you if I did yours.
- The maximum file size is 5mb per file. I don't have fast upload speed.
- One file per day for regular members. Leets gets 2 and Ubers gets 3.
- Don't ask questions about the crypter. It's not a public one. It's my private crypter.
- Please check my last post before you reply. Sometimes, when the crypter is detected, I will notify and won't be taking any requests at that time. Don't PM me at that time.

These are easy rules to follow. Please follow them and I will do your service.

Note: If my PM box is full, please reply here to notify me.

The Clown - August 5, 2011, 3:20 am

Hey bro i wish you the best i no how it feels to not be trusted just because you have a low post count.

xisle35 - August 23, 2011, 6:01 pm

hey, i'd take you up on this service in a heart beat if i could get just one of these server/client tools to work, I've compiled irc bots to failure, now use no-ip.com and ghostvpn which is nice, and learned how to (according to canyouseeme) port foward a verizon 5spot router. but for the life of me, and

anyone else for that matter, the damn things won't connect. I'm currently trying to get darkcomet 4.1(newest, came out in the last few days) to work; I can build a working server using my LAN address on Virtual Box, but once it leaves my computer it just dutifully sends keylogs to my ftp...which, frankly is neat, not what i want the WHOLE DARKCOMET suite to do, just keylog, and only to ftp. blah! lol, help!

but I'll tell you what, as soon as I get something that would actually work in the wild i'd be happy to let you fud it up. I have no idea how and I'm interested in the whole science.

thanks in advance :D

(i'm also experimenting w/ vertexnet php but i'm havin trouble finding a host that i can run the thing on atm, any suggestoins?)

ahmadijaz - August 23, 2011, 6:10 pm

i pm u chck mine and will be hit me back soon

SmokeyMcSmoke - August 24, 2011, 9:43 pm

plz crypt my cybergate server PLZ!!

Paradox_ - August 24, 2011, 9:44 pm

can you crypt my server too dawg? gonna PM

user.super - August 25, 2011, 6:33 am

Is it still FUD?

How is ti gdoing these days? DOes it work on DC4.1? Is it really FUD? Can I get it for free without a pass?

Armin Van Buuren - August 25, 2011, 7:45 am

plz crypt my blackshades server plz!!

bouhya - August 25, 2011, 8:06 am

plz crypt my Bifrost server ... Pming you

theperson - August 25, 2011, 8:09 am

PMing you now about crypting my BS server. Thanks a ton.

Just4lulz - December 14, 2011, 7:45 am

Sending you my server now, I would be forever grateful if you decided to crypt it freely :)

Will update this post if crypting is successful

Snapchat™ - December 14, 2011, 8:00 am

I'd like to do this vioa teamviewer, as some people make exact the same file and crypt their own file, so I would like for you do this via teamviewer.

ZerQI - December 14, 2011, 8:40 am

Hey man, can you crypt my server please I will PM you with my server link.

irunbremen - December 14, 2011, 12:59 pm

Can you crypt my file too?

PM me please, thanks in advanced :D :D :D: D

YUGOBOSS - *December 14, 2011, 1:02 pm*

Sounds great, i need to crypt my dc server :D

Thanks <3

tumaeka123 - *May 6, 2012, 10:35 pm*

Crypt my darkcomet server please... PMing you now.. please..

Thanks
