Thread: [\[TuT\] How to make a basic chat spammer](#)

BarneyStinson - August 4, 2011, 9:12 pm

Hello !

In this tutorial I'll teach you how you can make a chat spammer for msn, yahoo, ...

Start by creating a new windows forms application and call it Chat Spammer.

Change the form properties to your needs.

Add a

*Timer

*2 buttons

*TextBox

Your Form should look like the picture below.

[img]http://img34.imageshack.us/img34/2193/capturenj.png[/img]

Double click the start button and add the following code:

Code Timer1.Start()

Now add the following code for the stop button:

Code Timer1.Stop()

Double click the timer and add the following code:

Code SendKeys.Send(textBox1.Text)

SendKeys.Send("{ENTER}")

That is how you make a chatspammer !

P.S. Dont flame, I know this is very simple to do but this is for beginners wondering how this type of thing works.

Deceptive - August 4, 2011, 9:13 pm

This is a horrible method of creating an even basic chat spammer.

smasherx74 - August 4, 2011, 9:14 pm

Picture fail, btw you should set the timer interval to something like a textbox also. So they can control the speed.

Yeah I thought about that but I wanted to keep this as simple as quick as possible.

We appreciate your tutorial (at least I do), but this has been posted many, many times before in HackForums.

Here is the search results by searching 'spammers' inside the VB.NET section:

<https://hackforums.net/search.php?action=results&sid=fdb8e9e764e5aa2b381b253fb97cab25&sortBy=lastpost&order=desc>

Yes I know, i am just trying to get more involved in the community.

Tedd - August 4, 2011, 9:20 pm

No hotkeys, no pictures, no [code] tags?? Low quality in my opinion, yea the post has been shared a couple hundred times but at least spend your time on it :\

remmaz - May 1, 2012, 3:55 am

great Tut OP, worked first time and even spammed a couple of my friends

keep up the Good work

?

Broda - May 1, 2012, 4:02 am

I think this is probably one of the best programs for the beginners like me to start from. First time I just copy&pasted the code.

I learned when I tried to modify the code a bit and solve the errors I got. It actually helps you even if you just copy&paste the code and examine it well.

x64 - May 1, 2012, 4:46 am

Well.. It isn't hard to code ;p , but still handy for beginners.

Camf ? - May 1, 2012, 5:53 am

You should have explained more how it works not just given them the code, explain at the least about the timer intervals and how its in Milliseconds and just some other basic stuff

good tut, just needs a pinch of improvement

Meerkat.? - May 1, 2012, 6:33 am

1. I seriously have enough of all these fucking "chat spammers". They're fucking stupid and they have no use AT ALL. Why does everyone even keep making them? They're not even good to learn coding.

2. Even IF you're making a chat spammer, at least make one that stands out from the rest by using hotkeys, customizable speed, ...

3. Like some people before me said before, you should explain what everything is doing. Just by

learning newbies to copy-paste, they're not learning coding.
