Thread: [TUT: Mod popular games without iFile or a Computer](#)

S?arlet - August 5, 2011, 1:22 pm

Ok so these are the things you are required to have:

- Jailbroken iPod Touch
- Cydia

This tutorial is an easier way to get mods for games that are impossible to be hacked on iFile and would be too time consuming to be done on a computer so i will be using Call of Duty: Zombies as an example throughout the tutorial

--

1. First of all open Cydia
2. Goto the Manage tab on the bottom and then pick Sources
3. Then add a new source by tapping edit (in the top right corner) and then add (in the top left corner)
4. Type in this source: imodgame.appspot.com/
5. Tap done then wait as the packages and the source is added
6. When it is done tap return to Cydia
7. Goto sources again and the source you added should be there
8. Go on the source and you will see a whole list of game mods
9. I will use CoD: Zombies as an example so scroll down and find it, Notice: the cydia app labeled, CoM: Zombies is a completely different game
10. Install the CoD: Zombies Mods cydia app
11. Press respring springboard when the installation is finished
12. After that is done find the CoD: Zombies Mods app and go on that
13. When the app opens up you will see a list of mods, but dont activate anything yet
14. If you goto the second tab you will see a username and 100 modpoints (Modpoints allow you to pick a mod you want and activate it but you only have a limited amount of points)

Use your Mod Points wisely!

--

IF YOU WANT MORE MOD POINTS:

On the second tab it says something about an invitee

Put in a code and you get an extra 25 modpoints

Give someone your code and you get modpoints as well

Here is my code: MTQ3Nzg <<if you want free modpoints ?

--

Please post a comment and tell me if this helped!

By the way if you need ANY help just post here or PM me ?

?????-?u??? - August 5, 2011, 1:27 pm

If i do this will you use my code to get me more points?

somebody needs to explain this first...

By the way, can you turn the mods off and on without going into Cydia?

yes from the mod menu in the app itself

Grin - August 5, 2011, 2:04 pm

Basically if you don't invite they make you pay for mod points. It's better if you install repos like insanelyi and get the dlcs.

you get a free 100 modpoints just by installing any of the Nadis Lai apps but some people use up those modpoints on a game and want more points for another game that's why you have the invitation option i mean 100 modpoints is enough to get you all the mods for CoD Zombies but some other games require more points

AnthonyWasH3r3 - August 5, 2011, 3:07 pm

So. You can mod ANY game? If so, cool. If not, change the title. I don't think every game is on there.

sorry you're right, i changed the title

babiesinbondage - August 5, 2011, 10:06 pm

But nobody answered me... Can you turn them off and on or not?

Yes you can turn them off, from the app where you activated the mods

cysto - August 6, 2011, 1:07 pm

Mine is MTQ5MDE1
Any one minds using it? :P

Missile101 - August 7, 2011, 7:42 am

When I choose the source after I added it, theres nothing there.

But theres always idwaneo for dlc's. (insanelyi just copys the dlc's)

@cysto I'll use your code when I fix it. When I choose the source after I added it, theres nothing there.

But theres always idwaneo for dlc's. (insanelyi just copys the dlc's)

@cysto I'll use your code when I fix it.

thats unusual...try deleting the source and adding it again, The source in the tutorial isnt for dlc's its for game hacks such as infinite ammo, invincibility, infinite money, xp multipliers, money multipliers and super damage

cysto - August 8, 2011, 10:41 am

Will someone, like Fabius for instance, make a crack for them so we can activate the cheats without modpoints?

It's really annoying that we can only use one redemption code (invited by one user only) :/
