Everyone in Team Intra isn't smart in the slightest. They all do sql injection. They call themselves a security team, but all I see are defaces. They need help.

here are some posts from the second in command. Just showing how LQ he is.

<https://hackforums.net/showthread.php?tid=1474842>

--^--

doesn't even know how to boot someone offline? Isn't that what kids do on xbox live? Does he not know how to use the search button?

this is a leader of a "security team" so why is he asking these types of questions?

Not only this, but me and another member of team plague put a php shell on a site. Moments later team intra walk up steal the site and delete our shell. The sad part of it was that the host had other sites on there that they could have defaced, but sadly they don't know basic servers, or how a site works. They needed help uploading a shell on the site too.

Seems to me like you're a kid who manages through hacking something miniature and goes about with his now bloated ego because he feels like he's the shit.

I don't really like flaming people at all but you come across as an attention seeking dude.

Whatever's done is done, you cry so much about Intra stealing your shells but you fail to realize that the site was open to anyone for the taking, if you wanted to keep the site for yourself you would have patched it up and backdoored it. After all, you are an awesome hacker, you should know how to do that right?

Seriously, please, just leave it.

I do not think i'm a legit hacker, in fact i think i am very far from it, maybe one day i'll be able to call myself that but not now.

I do not think you're a skid either, i don't have enough information on you to come to that conclusion, but you do push it.

Quit fucking with Intra, you're so obviously jealous or an attention whore. Nobody gives a fuck what your "1337 h4x sk1llz" are because none of them can be verified. If your shell got stolen, grow the fuck up and move on. I know for a fact the group doesn't search for shells because I'm actually a part of it and if your shell was taken by one member of ours, whos fault is that? It's both yours for failing to secure it and theirs for stealing it (sort of). One member doesn't necessarily represent the entire group.

You just said that I can't verify it and you can. Well, lets see some proof?

Fuck up number two:

That was the most moronic and childish argument/attack I have ever heard. I could imagine that kind of thing coming from an 8 year old who just discovered racism and vulgar language but doesn't quite get the meaning behind it.

And finally, fuck up number three:

Code your covering up for your team and its pathetic tell your second in command he killed a great team.

I'm not covering up for my team, I'm defending it. You are making unverified and false claims as well as continuously flaming and I'm rebutting you. What's more pathetic, defending a group that's being attacked for no reason or flaming a group for no reason?

Please give up, your only making yourself look stupid and immature.

That post was equally immature and pathetic. Also, you never provided proof of your shell getting and your grammar indicates you are 7-10 years old.
